NOTES SECTION: (attach separate sheet if needed).

col 2 House Finch - 10 at feeder of Roger + Jean Dunn - have been present for quite some time

col 3 Cedar Waxwing - 6, Dark-eyed Junco - 3, Hoary Redpoll - 1 or 2, Am. Goldfinch - 1

All these birds were at the feeder of John Goyssaert at 512 Willingdon Blvd SE Calgary. He has pictures of the goldfinch which he sent to Inglewood B. Sanct. The Cedar waxwings were an added bonus. The waxwings were seen at close range in his backyard. Good look at the Hoary Redpoll with white undertail coverts, light streaking, whitish overall appearance, unstreaked rump.

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

NOTES SECTION: (attach separate sheet if needed).

Column 1: Pine Grosbeak - a juvenile (probably ♀) very gray with faint yellowish wash on upper breast. Barely discernible streaks on breast. Distinct whitish wing bars and white tail spots

Column 2: Pine Grosbeak - same bird, staying with R-b Nuthatch's, feeding on grubs in White & Blue Spruce

Column 3: BRAMBLING - feeding on sunflower seeds at feeder. The Atwells report, also seeing this bird hunting in leaf litter for insect larvae in vacant lot next door. This bird has been there daily since mid December 93.

Yellow-rumped Warbler - feeding on mixed peanut butter/ground suet mixture. Over wintering

DESCRIPTION: Write a detailed description. If you are not familiar with all of the terms used to describe a bird see your field guide topography page and try to describe each part of the unusual bird. Get as much information down as possible as to shape, colour, patterns, unique features, etc. **SKETCH** the bird and show as much detail as possible.

Jan 11 This bird was first sighted by me with the help of a young man who has frequently ~~observing~~ observed this illusive bird. After much looking with scope and careful focusing; a slight movement of the bird the orange red bill was seen, the tuft on the head and the orange mark at the edge of the wing observed. By this time, the bird was scrutiny around in leaves almost the very color of its back. We observed it at 40 feet for 20 min with spotting scope.

Jan 22 Same bird. Same spot. Once again only after very careful focusing of the scope on the very same spot, below the small embankment just at the edge – 2 meters from west end of foot bridge and at the base of the dogwood shrub, did we find the bird again scrutiny around in the leaves.

Feb 4 After about 10 mins of observing @ 40 feet the bird flew out to picnic table level just above recreatment end west of bridge. We had placed a small pile of crushed corn on the table when we arrived. After a few minutes I went up & over the bridge & saw the bird there – not eating. I stood very still observing at 20 ft. She then flew to a nearby aspen where I had a wonderful 2 minute look @ 10 ft distance from there the bird flew to dogwood to N of the path & did not see it again that day.

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

* PALO-0105 - 1 s.p. in small back eddy just W of 10th St bridge. Remainder of river covered w. ice chunks. Loon was diving frequently & appeared to have ice buildup on image. Very cold day -25°C. Bird observed for 10 mins @ 75 m through 22x binoculars scope. Seen previously by many observers. Throat looked dark (purple?) of anything. No hint of green.

NOTES: (attach separate sheet if needed)

* NCA 0105 - ♀ observed at 5m
Cinnamon, 10x40 from @ 1500 feeding on
ungrazed + discolored Red Osier Dogwood berries. Bird would hop up and
break off a berry cluster + then slowly consume the berries. Did
not seem at all concerned about my presence possibly because
of cold + eating to be done. (Previous observers had reported the bird
as skittish + difficult to see). Bright red bill clinches the bird as ♀,
as opposed to male ♂. Seen previously by many observers.

Bird Record Sheet

ENTERED April 17/94 [illegible]

PROOFED April 19 94 [illegible]

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK "*" (ie: field marks, habitat, voice, behavior).

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

NOTES SECTION: (attach separate sheet if needed).

Common Teal - flew down river while we were losing our bank at Bonnybrook
flew then out over the trees to the open meadow - never saw it again
Dark in pit noted.
Swans - white not seen 200 + it was a cooler day so the Swans had
their heads tucked down so Trumpeter Swans was not determined.
It was almost Bonnybrook 3 lake
Northern Pintail not Pintail but Shoveler stay
Western Grebe setting on nest

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

Species: ARCTIC TERN Date: MAY 4, 1994

Number: 2 Age: adult Sex: ?

Locality (Exact information if possible): Lost Lake (about 5 mi ESE of Enchant + 8 mi. NW of Vauxhall)

Time: 1200h Length of time observed: 20 minutes

Observer: Ray M. Wershler

Other Observers: Wayne W. Smith

Who first saw bird?: Ray Wershler

Who first identified bird?: Ray Wershler

Optical equipment used: Discoverer 15-60X telescope

Distance to bird: about 50 metres

Weather/Light conditions: scattered clouds, some sunny breaks

Was the bird photographed?: No

Comparison species present: Yes - Common Terns + Caspian Terns

Experience with the species: Both have seen many off the west coast of N.Am.

Voice and /or call notes: N/A

Was a field guide used while the bird was under observation?: No If so how do you think it might have influenced your decision?:

Habitat discussion : barren island in lake

Behavior: sitting with other terns, then flew off to feed with some others

Are you 100% certain of the identification?: Yes Are others 100% certain: Yes

How were similar species eliminated?: The two birds were sitting together in amongst many Common Terns. It was immediately obvious that there were two shorter darker terns amongst the Commons. When the sun popped out the shorter darker red bill could be seen - the Common Terns had orangish-red bills with dark tips. The birds took off and were flying over the lake with Commons. We didn't get a good look at them in flight.

John Riddell saw one of the birds in flight on MAY 5 (next day) and observed the silvery wing linings without the dark wedge.

Species: Chestnut-sided Warbler. Date: June 6, 1994.

Number: 1 Age: Sex: Male.

Locality (Exact information if possible): South side Bow River - west of Pumphouse Theatre - in thick river bank vegetation - see attached map.

Time: 1240 HRS. Length of time observed: 20-30 minutes.

Observer: DAVID VERNON.

Other Observers: NONE.

Who first saw bird?: as above.

Who first identified bird?: as above.

Optical equipment used: Binoculars - 7x35.

Distance to bird: 15-20 feet.

Weather/Light conditions: calm - overcast but excellent viewing conditions.

Was the bird photographed?: no.

Comparison species present: Gray Catbird - Cedar Waxwings.

Experience with the species: none with this particular species.

Voice and /or call notes: cheery-melodious song.

Was a field guide used while the bird was under observation?: No. If so how do you think it might have influenced your decision?:

Habitat discussion : dense river bank vegetation - described on reverse.

Behavior: very active - moved freely through branches foraging for insects.

Are you 100% certain of the identification?: YES. Are others 100% certain: —

How were similar species eliminated?: When the bird was first sighted (after first hearing its song) I realized it was a warbler but was unsure exactly which bird. As this was a new sighting and as I did not have a guide I made a rough sketch (attached) noting its plumage and referred to the field guide later that afternoon at which time the identification was made.

Get as much information down as possible as to shape, colour, patterns, unique features, etc. **SKETCH** the bird and show as much detail as possible.

The bird I observed was, I believe, slightly larger than a yellow warbler. It was very active, moved freely and continuously through the brush looking for insects. Was quite vocal with a cheery song. Much of the foraging in the brush was spent at levels estimated to be between 6 to 15 feet throughout the sighting area. Topography I noted is as follows:

Crown - bright yellow.
Eyebrow - black.
Whisker - black.
Eyepatch - white
Chin "
Throat "
Breast "
Belly "

Sides - rust
Back - black/yellow stripes

Habitat:

Poplar trees.
* Willow
* Water Birch.
Prickly Rose.
Wolf Willow.
Honeysuckle.

* Of the vegetation noted the bird spent its time foraging in the willow and water birch trees.
