SEND TO: C.F.N.S. - Bird Records

P.O. BOX 981

Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet if needed).

C.F.N.S.

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

RECORD FORM FOR UNUSUAL BIRD SIGHTINGS

ENTERED February 6/95 JEK
PROOFED Feb 7 '95 DB, DGF

Please enclose original field notes or copy of notes. Please delay reference to books until sketches and description complete.

Species: Cassin's finch Date: Dec 11/94

Number: 1 Age: Sex: male

Locality (Exact information if possible): 7220 Bow Cresc NW

Time: about 10:00 am Length of time observed: several minutes

Observer: Don Beers

Other Observers: Keitha Beers

Who first saw bird?: Don

Who first identified bird?: Don

Optical equipment used: 10 x 40 binoculars

Distance to bird: first located - 20 m; then flew to 10 m

Weather/Light conditions: sunny (1), but bird in shade at first location

Was the bird photographed?: no

Comparison species present: none

Experience with the species: Previous sighting at Canmore feeder

Voice and /or call notes: no

Was a field guide used while the bird was under observation?: yes If so how do you think it might have influenced your decision?: Eliminated possibility of similar species

Habitat discussion: first locale - feeding on low weeds, then flew to perch on cottonwood (second perch) sapling at eye level. Flew to shrubbery, then out of sight

Behavior:

Are you 100% certain of the identification?: yes Are others 100% certain:

How were similar species eliminated?: Squarish red patch on crown (as illustrated in 1990 edition of Peterson guide) was clearly observed in both locations I saw the bird. The red extended to the back of the head, (not just the cap as in a redpoll).

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

UNUSUAL BIRD SIGHTINGS

ENTERED February 24/95 JEK
PROOFED Feb 28 '95 DR, DEF

Please enclose original field notes or copy of notes. Please delay reference to books until sketches and description complete.

Species: Greater Scaup Date: January 30, 1994

Number: approx. 50 Age: Adults Sex:

Locality (Exact information if possible): south side Sundance power plant cooling pond 114°30' 53°28' Edmonton

Time: mid afternoon Length of time observed: 15 minutes

Observer: Ross Dickson

Other Observers: David D Nadeau

Who first saw bird?:

Who first identified bird?:

Optical equipment used: Spacemaster II Scope, binoculars

Distance to bird: various 100 → 300 m.

Weather/Light conditions: light overcast

Was the bird photographed?: No

Comparison species present: Lesser Scaup, Ring necked Ducks, Redheads

Experience with the species: scattered individuals Calgary + at Lac La Biche, small flock at Pendicton

Voice and /or call notes: none

Was a field guide used while the bird was under observation?: No If so how do you think it might have influenced your decision?:

Habitat discussion : cooling pond

Behavior: swimming + flying

Are you 100% certain of the identification?: Yes Are others 100% certain: Yes – Nadeau

How were similar species eliminated?: white extended to about 8th primary of most flying birds – sides/flanks of males immaculate white – head shape rounded with nearly vertical forehead all indicate Greaters. Lessers have shorter white primary streaking – dirty white flanks/sides – + peaked crowns. Ring necked ducks have similar head shape to Lessers

940385

DESCRIPTION: Write a detailed description. If you are not familiar with all of the terms used to describe a bird see your field guide topography page and try to describe each part of the unusual bird. Get as much information down as possible as to shape, colour, patterns, unique features, etc. **SKETCH** the bird and show as much detail as possible.

While the species is an annual migrant through Alberta, the number (50) of birds identified as Greater Scaup is unusually large at any time of year in this province. The birds were first seen while they swam in two small flocks. The gleaming white sides were very noticeable even without the use of binoculars. After a few minutes, the birds flew away from us in two figure 8 patterns before returning to land in almost in the same location. It was of interest to see that not all Lesser Scaups flew even though they were close by. After the birds landed, all of the Greaters stayed together while the Lessers swam along the fringe of the flock but did not mix into the centre of the flock.

Lesser Scaup males were especially evident when they swam with the Greaters. They were smaller in bulk, had dirty grey sides and peaked crowns. There were about 15 males + females of the Lesser Scaup. Two male Long-necked Ducks stayed seperate from these other species. Also nearby were 5 male + 2 female Canvasbacks, about 15 Redheads and 4 Western Grebes in addition to at least 75 Common Goldeneyes. Elsewhere on the pond were 8 male Hooded Mergansers and 1 immature Double-crested Cormorant.

All ducks and grebes were paired where numbers permitted.

Species: Band-tailed Pigeon Date: Sept 3 1994

Number: 1 Age: unknown Sex: unknown

Locality (Exact information if possible): Immediately south of S. end of "restricted area" of Inglewood Bird Sanctuary (see overleaf) Calgary

Time: 1120 Length of time observed: approx. 5 minutes

Observer: R. Dickson, D. Paton, K. Tamminga Paton

Other Observers:

Who first saw bird?: K. Tamminga Paton

Who first identified bird?: Dickson

Optical equipment used: 7X42 Leica binoculars

Distance to bird: 30m.

Weather/Light conditions: partly cloudy, bright sunny breaks

Was the bird photographed?: No

Comparison species present: none

Experience with the species: Dickson - Burnaby, B.C. in late 1980s

Voice and /or call notes: silent

Was a field guide used while the bird was under observation?: No If so how do you think it might have influenced your decision?:

Habitat discussion :

Behavior: Bird flew to top of poplar, sat for a few minutes, then flew WSW NW.

Are you 100% certain of the identification?: YES Are others 100% certain:

How were similar species eliminated?: Obviously a pigeon or dove, but larger than prevalent Rock Doves. White collar on nape very obvious through binoculars, as was large broad tail. This combination rules out Rock Doves. Less reliable but still useful is the behaviour, that of perching atop a live poplar. I seldom see Rock Doves perch in trees, but it has always been (so far) in dead ones when it happens. Almost every Rock Dove has a white rump, something this bird lacked.

940386

DESCRIPTION: Write a detailed description. If you are not familiar with all of the terms used to describe a bird see your field guide topography page and try to describe each part of the unusual bird. Get as much information down as possible as to shape, colour, patterns, unique features, etc. **SKETCH** the bird and show as much detail as possible.

See attached notes from my notebook. There was one problem with the sketch, which was done in ink and therefore could not be amended. At first glance, the wings appeared to be nearly the length of the tail, but this was not the case. The tail tip was indeed longer than the wing tips. Otherwise .... an obvious pigeon/dove. A small head in relation to body bulk. Slate-grey back + head. Obvious white nape collar. A large squared tail, medium brown. The bill appeared to be pinky-orange with a dark tip. The lower neck which often appears to be a coppery-barred patch was not obvious, so it may have been the angle of the lighting. The bird had no white rump patch. The belly/breast areas were not observed. When the bird flew, it was similar to the motion of a Rock Dove. However colouration of the underwing + primary feathers in flight received no concensus between the 2 observers who were watching it while Dickson tried to set up a spotting scope. The bird was silent while perched.

Habitat: a grove of trees beside the bike path where it joins Sanctuary Road. The bird flew in from the north along the river, then went toward the oil storage tanks West or NW of the observers' position.

Signature: Ross D. Dickson Ross Dickson

Address: October 1, 1994

Date prepared:

Telephone: 403 468 6519 Edmonton

- wings pointed down
- when it took off, in the flank area the colour was dark brown - darker or similar shade to tail
- bird silent - wings made noise
- it sat at very top branch (live branch) at top of live popla
- size of a pigeon or bigger neck seemed long - to emphasis relatively small pigeon/dove type head
- bill was pinky-orange in good light
- couldn't tell eye colour or presence/

absence of eye ring
- didn't see legs
- back and head slate-grey
- very striking white incomplete neck collar, at most it went halfway around
crescent shape from rear

Thicker in middle than at ends
- ends of wings (flight feathers/primaries), when perched were very dark/maybe black on top
- unsure about feather coloration beneath wings
- belly not observed
- lack of consensus on whether tips of primaries were white or light tipped, in flight
- flew like Rock Dove

in direction of grove of trees on railway property to NW
- tree about 30 ft high on vantage point 60-75 ft away
- bird always partially concealed on lower bed

Time 1120
Date Sept 3 1997

Lighting - bright sunny breaks

Dale Paton
Karen Tamminga-Paton

Species: Rufous-sided Towhee Eastern Race Date: Dec 10 1994

Number: 1 Age: Adult Plumage Sex: Male

Locality (Exact information if possible): Jack Fish Lake (East side) Carvel
Access is from Hwy 770, 2 miles N of Hwy 627 53°28' 114°13'

Time: 1125 Length of time observed: 1125 – 1135

Observer: Ross Dickson

Other Observers: –

Who first saw bird?: Reg Kirkham – the homeowner (403) 963-6241 Date 1st Oct 3rd

Who first identified bird?: Kirkham, and later, by Richard Klaus

Optical equipment used: Leica 7X42

Distance to bird: 8 m.

Weather/Light conditions: overcast, calm, –25°C

Was the bird photographed?: Yes – Kirkham has "identifiable" photos. One has been given to the Alta. Ornithological Records comm.

Comparison species present: House Sparrow 2, BC Chickadee 6, Eve Grosbeak 5,

Experience with the species: Only with western race – along Red Deer R. valley every summer

Voice and /or call notes: None

Was a field guide used while the bird was under observation?: No If so how do you think it might have influenced your decision?:

Habitat discussion : Farm yard, feeding stations beside a small garage, 6m from farmhouse, scattered poplars + shrubbery within 20m

Behavior: Skittish, associated with House Sparrows presence, not with any other species

Are you 100% certain of the identification?: Yes Are others 100% certain: Yes

How were similar species eliminated?: It had been identified by others.

Combination of hooded appearance and rufous/rusty sides eliminated DE finches, + Chickadee (sp.). Differed from west race by lack of white spottings on back and lack of wing bars.

** Significance – This (the photos) is the first documentation of the Eastern race by this species in Alberta, at any time of year.

940387

DESCRIPTION: Write a detailed description. If you are not familiar with all of the terms used to describe a bird see your field guide topography page and try to describe each part of the unusual bird. Get as much information down as possible as to shape, colour, patterns, unique features, etc. **SKETCH** the bird and show as much detail as possible.

Rufous-sided towhee - Eastern form male.

Dull black hooded head, back, upper wing surfaces and tailfeathers. Distinct white patch on wing at rest, perhaps on outer primary, not on the alula. Rufous/rusty sides + flanks - extending from hood to behind the legs. A dull yellowish rufous in the vent area. A ragged-edged dull white belly. Eye was a very dull reddish brown & could have been less intense because of light conditions. Flesh colored legs + feet. When the bird flew, white spots on the tips of tail feathers. There may have been a small white spot on the scapulars but the bird usually was facing me, so I may have seen some down. The bird was fluffy whenever it wasn't flying. When it landed on the ground below the feeding station, it immediately ~~would~~ fluffed its feathers and squatted to the ground surface. It hopped on one foot, then the other, keeping the other foot tucked into its feathers, then quickly would squat. It would then pick at scattered seeds, then hop/squat to the next spot. It was very skittish, and would fly off at the first hint of danger - like the call of a Blue Jay. The homeowner told me the overnight temperature had twice dropped to -36°C so far this winter. He did not know where it perched overnight.

Signature: Ross D. Dickson Ross D. Dickson

Address: 200, 4999 98th Ave NW, Edmonton T6B2X3

Date prepared: Dec 10, 1994

Telephone: (403) 957-8687 - office

It usually fed first thing in the morning - "like a pig" whenever possible, ~~as~~ according to the homeowner. It showed up at the feeder only when House Sparrows were passing

Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet if needed).

Col 1 [illegible] plumage. Perched on light standard beside exit ramp.
Col 2 One flock of [illegible] was estimated at 1500, followed by another flock of 100. The sound of their flight at quite a height, was of wind vibrating electrical wires. Kingbird was hovering above small patch of open water. [illegible] were 1 adult & one young. [illegible]
Col 3 [illegible] probably part of the large flock seen earlier at Point Allison

NOTES SECTION: (attach separate sheet if needed).

Col 1 Siskins appeared to be 2 adults + 1 immature. The latter had less well defined yellow wing bars. They were at a feeder with the redpolls, feeding at the same time without apparent aggression between species.

Col 2 [illegible] appeared to be paired up. [illegible] were 50 & 27, [illegible] Grosbeaks males were noticeably larger than nearby hens. Group. They (Greaters) had immaculate white sides compared with dirty grey of lesser males. In flight, white in primaries extended nearly to wing tips. Forehead of a Greaters male shrinked rose abruptly from bill, almost like Barrow's Goldeye. Greaters in general had the rounded profile. Lessers males invariably had the peaked head profile. This is a huge # for winter [illegible]

NOTES SECTION: (attach separate sheet if needed).

Col 1 [illegible] had been banded in February 1993 at the same location. One was intermediate plumage, close to being called a Hoary Redpoll. The birds identified as Hornies were captured in mistnets and examined for wing chord, undertail coverts streaking before being identified. Pine Grosbeaks were 3 adult males, 4 others which could not be identified as to age or sex.

SUBMITTER: R D DICKSON

ADDRESS: 5-7812 - 106 Ave Edmonton

PHONE:

SEND TO: C.F.N.S. - Bird Records
P.O. BOX 981
Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet if needed).

Col 1 — Waxwings have been all but invisible here since mid December. A week long spell of cold weather is ending today with warm air only a few hundred feet up. Waxwings are very active, some mountain ash trees are attracting attention

Col 2 — Eating mtn ash berries on 2 trees in cemetary.

Col 3 — Immature owl perched in top of poplar tree. I've never seen a Snowy in a tree before!

C.F.N.S.

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet if needed).

Col 1 - ~~woodpecker~~ was flying above road - So not possible to determine
with 10 minutes of first sighting we saw 8 more - 3, 2, and 3.
Col 3 - Got photo on stick nest in aspen poplar grove as I drove by. When
I backed up she jumped to a nearby branch, then resumed
incubation posture back on nest within 60 seconds. No male seen.

NOTES SECTION: (attach separate sheet if needed).

Col 1 ~~Golden Eagles~~ were too far away to determine age by plumage. One however was an immature. Also seen were 4 Kill coins and 1 call. Winds were light and changeable by direction. Sky varied from 0% to 90% cloud (strato cumulus). Temperature from -7°C to -2°C. Snow depth was quite high. Also seen on way in were wolf tracks (1 set) near cattle guard at beginning of Weldlife Sanctuary. ~~Three white tailed deer~~ were also seen there.

Col 2 - ~~Junco was~~ Oregon race while singing as if on territory.

NOTES SECTION: (attach separate sheet if needed).

Col 3 - Golden Eagles were coming off Mt MacGillivray, heading north over my head. Scattered strato cumulus cloud, under 100% alto cumulus layer, 15-25 km/h downvalley wind

C.F.N.S.

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

SUBMITTER: R D DICKSON

ADDRESS: 5-7512 - 106 Ave Edmonton

PHONE:

SEND TO: C.F.N.S. - Bird Records
P.O. BOX 981
Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet if needed).

Col 2 - Light morph ~~rough leg~~ sitting on fencepost beside road.
~~Longspurs~~ were in flight over stubble fields when I got out of car to look at hawk
Col 3 - ~~Shorts~~ were uncollared - I appeared to retain some
dark juvenile plumage on nape & crown.
~~Horned~~ Horned larks were very active. During the 15
minutes I spent there she flew twice with the male
close behind. He displayed whenever she changed direction
while swimming

P.O. BOX 981
Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet if needed).

C.F.N.S.

Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

NOTES SECTION: (attach separate sheet if needed).

Col 1 Female Downy Woodpecker was excavating cavity in dead birch about 7m up. One Hairy Woodpecker ♂ seen, another Hairy (sex?) heard in distance at same time. Flicker heard only. Kinglet moved around quite a bit, they may have been two. Likewise for the Purple Finch. The finch sang intermittently while feeding on aspen catkins at treetop level. Only a hint of pink on throat & the rest of plumage was that of an adult female ⇒ this was a juvenile (or 2nd year male) since they molt into red plumage in 2nd autumn. I think (but cannot be sure because angle of sun affected colours) that there was an adult male – a small bird showing pink on belly flew from treetop while I was searching for the one described previously).

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

NOTES SECTION: (attach separate sheet if needed)

Col 1 - Didn't get age info. They were together flying around treetops along main access road near Administration Road Intersection

Col 3 - Along south shore, within scoping distance there were at least [illegible] waterfowl, mostly unidentifiable dabbling ducks. I did not see scaup, redheads or canvasbacks.

Col 1 - [illegible] were 6 adults + 22 cygnets. Young ones had been transplanted from Grande Prairie

Bird Record Sheet

Please print information legibly.

ENTERED February 25/95 DEK

PROOFED March 14/95 DDC, DEF

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

(Unusual Bird Record Sheet #940387)

NOTES SECTION: (attach separate sheet if needed).

Col 1 - Towhee is an adult male EASTERN RAIC of this species. (Details provided elsewhere on an Unusual Bird Sightings Form to IBS). First documented eastern race in Alberta at any time of year.

Col 2 - Temperature was about -5°C, the warmest it's been in a week. The Robin was perched in a Green Ash tree with the waxwings. It was quite active + vocal.

C.F.N.S.

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

RECORD FORM

FOR

UNUSUAL BIRD SIGHTINGS

ENTERED March 13/95
PROOFED March 14/95

Please enclose original field notes or copy of notes. Please delay reference to books until sketches and description complete.

Species: ~~Presumed: Chestnut-backed~~ Chickadee **Date:** October 22 to November 20, 1994

Number: ~~One~~ **Age:** ~~Adult~~ **Sex:** Unknown

Locality (Exact information if possible): SW 30-37-20-W4, 8 miles south of ERSKINE AB 50 miles east of Red Deer

Time: Mornings **Length of time observed:** Feeding times daily

Observer: Lloyd Lohr & Dorothy Lohr

Other Observers:

Who first saw bird?: Lloyd Lohr

Who first identified bird?: same

Optical equipment used: None

Distance to bird: 1½ metres or 5 feet

Weather/Light conditions: Good

Was the bird photographed?: Yes, film still on camera. Used 200 mm lens

Comparison species present: ~~Black-capped Chickadees~~

Experience with the species: Familar with them in British Columbia.

Voice and /or call notes: Never heard any

Was a field guide used while the bird was under observation?: Yes **If so how do you think it might have influenced your decision?:** Just checked it out

Habitat discussion : Fed at suet basket

Behavior: Very nervous at first. Came in from same direction and followed same pattern

Are you 100% certain of the identification?: Yes **Are others 100% certain:**

How were similar species eliminated?: Chestnut sides and back from Black-capped black cap and white cheeks from Boreal. Also slimmer and shorter than other Chickadees.

940423

DESCRIPTION: **Write a detailed description. If you are not familiar with all of the terms used to describe a bird see your field guide topography page and try to describe each part of the unusual bird. Get as much information down as possible as to shape, colour, patterns, unique features, etc. SKETCH the bird and show as much detail as possible.**

The suet basket is just outside a kitchen window and at breakfast I was noticing the Black-capped Chickadees, Downy and Hairy Woodpeckers, White-breasted Nuthatch and 2 Blue Jays coming and going. Then this smaller, slimmer Chickadee caught my eye. It was nervous and fed quickly and left but not until I had seen the bright colored sides and back. I had first seen this kind on the trail to Wapta Falls, west of Field, B.C.

However I checked in the Peterson's Guide, western edition to refresh my memory. also later in other books. The suet feeder is in the shadow most of the time but I tried some photographs with the telephoto lens on the 35mm camera but the film is not developed yet. The bird was very nervous and tried to stay out of sight while feeding. It has not been seen since November 20. However I am gone during the daylight hours so easily could be missing it

Main features were smaller and slimmer. black cap, white cheeks and bright reddish sides and up into the back. At the feeder it could be observed at all angles.

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

NOTES SECTION: (attach separate sheet if needed).

Noted large flock of Starlings on two occasions circling above the escarpment on Southland Dr. near Deerfoot Trail

C.F.N.S.

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

NOTES SECTION: (attach separate sheet if needed).

① Immature seen several times. Entirely cinnamon brown (no streaking) with white "frosted" primaries, tail "brown". Ring-billed Gulls flocked with Herring Gulls. Bill and all flesh pinkish. Overall body plumage very pale and frosted. (a Herring Gull with an all-black bill at this stage should be darker than this bird was) Very much smaller than Herring Gull. ② NEARBY, CALIFORNIA Gull with a much smaller appearance (rounded head) than Herring Gull would be. 4 males in breeding plumage and 5 females

SEND TO: C.F.N.S. - Bird Records
P.O. BOX 981
Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet if needed).

① One very large nesting still in the nest ② Yellow-shafted subspecies
③ A very small bird, smaller than the female Song. It was still undetermined when
Ground-Lead windowance clearly seen at short distance (40 yds or more) with 22x scope
Lighting conditions excellent (direct sunlight from behind, no glare) Forehead sloping
Throat contrast for male Lesser Scaup swimming with feet and wing strips
not seen but there is no doubt of Ground-Lead windowance and sloping
forehead

C.F.N.S.

Bird Record Sheet

ENTERED June 20/95 JEK

PROOFED June 22 95 OD DJ

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

SUBMITTER: (4) Seen only once all morning. Dark partial throat patch seen again

ADDRESS: Extreme tipped flanks noted as dingy (not rufous) under parts

PHONE: white tips on green wings seemed longer than Rufous

Female July - Ruby-throated & Calliope the most have dark central throat patch, too early to be immature male ruby-throated or calliope and they don't show throat markings until late summer

SEND TO: - C.F.N.S. - Bird Records
P.O. BOX 981
Calgary, Alberta T2P 2K4

NOTES SECTION: (Attach separate sheet if needed)

(1) Beyond Bonnybrook west of Railway Slough (2) This bird appeared on territory & observed it in the area for at least 15 minutes. It was concerned at my presence & somewhat agitated. Location is south on 2nd road east of Railway Slough the most east intersecting by road (3) Probable female-dark red central throat patch, green upper parts, tail green but dark towards white tips on bottom tail feathers, no uniform colouration discerned at all. Size as large if not slightly larger than nearby Rufous. Bill seemed longer & slightly thicker. Rufous were extremely helpful towards identifying white with no brown noticed again. Dark throat colour
