Column 1 - Area covered was
Lac Des Arc, Bow Valley Provincial
Park and Trans Canada Highway to
Calgary city limits

(re Western Tanager - this critter had recently died apparently caught in some branches of a small
tree at BVPP - it was still warm)

Column 3 - RW Blackbird and YH Blackbird are seriously undercounted. There were
probably double those numbers, but I occasionally just forgot to count, when concentrating
on other birds. Totals included one stop east of Strathmore prior to Naamoka

Hammond Flycatcher?? - 1, (col 3), heard first, sounds like Dusky flycatcher, responds to tape record of HAFU call played by B. Storms. I don't believe DUFL call was played - to see if bird would respond to that call. Aspen groves on open steep slopes, typical DUFL habitat. Bird did ^{however} make an immediate approach toward and above us when tape was played.

searched out, open forest, much understory however tops of aspens in area where warbler was first found (5) were mainly leafless - perhaps eaten by caterpillars

* Rufous-sided Towhee^(col 2), glimpsed only 10 across an opening, low to ground, bird appeared to be a ♂. This ^{the only time} ~~is the only time~~ I have seen this species w of Cochrane, perhaps popular along Bow River Valley w of Cochrane to Ghost-Res area.

* Nashville Warbler - 1-2 (Col 3) in area as reported first on 3 Jun '86, only one bird seen, possibly a second bird heard
