Nature Calgary Birding Sightings Archive

1996 Part 2

Record numbers 960089-960200

C.F.N.S.

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

NOTES SECTION: (attach separate sheet if needed).

ROBINS FLICKERS GRASSHOPPER SPARROWS - FLEDGING ALL WEEK

1-MALLARD HEN WITH 6 DUCKLINGS

PELICAN SOARING.

C.F.N.S.

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

NOTES SECTION: (attach separate sheet if needed).

2 AUG. CROWS CONGREGATED IN ONE TREE FOR 20-25 MIN THEN LEFT AS QUICK AS THEY CAME.

2 AUG. OSPREY JUST PATROLLING RIVER. NO SIGN OF A FAVORITE PERCH.

4 AUG. SOLITARY SANDPIPER ?? HAVE NOT SEEN ONE BEFORE. WAS IN GRASSY PATCH IN BOW RIVER ALONE ABOUT 25 YDS AWAY HEARD NO CALL - DID NOT SEE IT FLY - BUT DEFINITELY A SHORE BIRD. DEFINITELY NOT A KILLDEER.

C.F.N.S.

Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

SUBMITTER: A. A SPENCE

ADDRESS: 2040-52 AVE SW

PHONE: 243 7571

SEND TO: C.F.N.S. - Bird Records
P.O. BOX 981
Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet if needed).

26 AUG. LEAVES BEGINNING TO TURN TO FALL THAN I'LL BE ABLE TO COUNT ORIOLE NESTS, IF BEAVERS LEAVE ENOUGH TREES STANDING

C.F.N.S.

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

NOTES SECTION: (attach separate sheet if needed).

11-12 AUG. CATBIRDS HAVE STOPPED SINGING - TRILLING - + HAVE REVERTED TO MEWING. FROM LOCATIONS OF THE MEWING IT SUGGESTS THERE ARE 4 TO 6 OF THEM IN THE SANDY BEACH AREA.

12 AUG - ORIOLES USUALLY LEAVE THIS PARK 15TH AUG. ANNUALLY + RETURN 15 MAY.

C.F.N.S.

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

SUBMITTER: A. A. SPRUCE

ADDRESS: 2040 - 52 AVE SW

PHONE: 243-7571

SEND TO: C.F.N.S. - Bird Records
P.O. BOX 981
Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet if needed).

24 SEPT. CEDAR WAXWINGS APPEAR TO BE GROUPING UP.

24-SEPT. WATCHED RED TAIL HAWK ATTACK AND FLY OFF WITH APPROX 2 FT GARTER SNAKE ON HILLSIDE. HAWK WAS VERY VOCAL AFTER CAPTURE.

C.F.N.S.

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

Bird Record Sheet

ENTERED April 4/98 JEK

PROOFED April 28 '98 OK JJG

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

04-NOV 86 BALD EAGLE CRUISING UP AND DOWN ELBOW RIVER

ABSENCE OF CEDAR WAXWING THIS YEAR IN SANDY BEACH IS NOTABLE. THERE JUST AREN'T ANY.

C.F.N.S.

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

SUBMITTER: A. A SPRUCE

ADDRESS: 2040-52 AVE S.W.

PHONE: CALGARY AB

SEND TO: C.F.N.S. - Bird Records
P.O. BOX 981
Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet if needed).

NOV 30-90

DIPPER FINALLY SHOWED UP & AMUSED MYSELF + THREE OTHER PEOPLE. THEY HAD NEVER SEEN ONE. THEY WERE VERY IMPRESSED WITH IT'S ANTICS IN THE WATER.

C.F.N.S.

Bird Record Sheet

ENTERED April 11/97 [illegible]
PROOFED April 25 98 [illegible]

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

NOTES SECTION: (attach separate sheet if needed).

STARLINGS AMUSING TO WATCH EMERGING ABOUT 9 AM FROM 2 DEAD TREES WITH WOODPECKER - FLICKER HOLES, WHICH LEAN HIGH RISES. AS THE SUN COMES UP + WARMS THE DAY, STARLINGS COME OUT OF THE HOLES (6-9 PER HOLE) LIKE A NIGHT SHIFT OUT OF A FACTORY, AND HEAD TO THE PARKING LOT, (ADJACENT TREES) FLUFF THEMSELVES UP - + DISPERSE.
MAKES YOU WONDER, HOW MANY STARLINGS CAN BE IN A HOLLOWED DEAD TREE.

C.F.N.S.

Bird Record Sheet

ENTERED April 11/98 JEK

PROOFED April 25/98 OR

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet if needed).

Borrowed scope — about "semi color" clubpitch.

C.F.N.S.

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

Red Knot

RECORD FORM
FOR
UNUSUAL BIRD SIGHTINGS

ENTERED: April 11/98 JEH
PROOFED: May 5/98 OD

Please enclose original field notes or copy of notes. Please delay reference to books until sketches and description complete.

Species: Red Knot Date: May 20/96
Number: 72 + Age: – Sex: –
Locality (Exact information if possible): Namaka lake - South West corner
Time: 3 ish PM Length of time observed: 20 minutes
Observer: Reid Barclay + Lynn Vogt
Other Observers:
Who first saw bird?: Reid Barclay
Who first identified bird?: Reid Barclay
Optical equipment used: B+L scope + binoculars
Distance to bird: overhead when flying
Weather/Light conditions: Sunny; little cloud
Was the bird photographed?: NO
Comparison species present: Black Bellied Plovers 150+
Experience with the species: yes (both observers saw Red Knots on May 18/19 in separate sightings)
Voice and /or call notes:
Was a field guide used while the bird was under observation?: ✓ If so how do you think it might have influenced your decision?:
Habitat discussion : travelling with BBPL; on mud flats at lake
Behavior: flying over head; then returning to feed with BBPL in mud flat area
Are you 100% certain of the identification?: ✓ Are others 100% certain: ✓
How were similar species eliminated?:

960162

DESCRIPTION: Write a detailed description. If you are not familiar with all of the terms used to describe a bird see your field guide topography page and try to describe each part of the unusual bird. Get as much information down as possible as to shape, colour, patterns, unique features, etc. **SKETCH** the bird and show as much detail as possible.

Red belly & underparts and throat to face.
Bill all dark; (not long like a dowitcher)
Shortish; straight bill.
Back rufous/gray/brown mottled looking.

Signature: Lynn Vogt
Address: 5201 315 Southampton Dr SW T2W 2r6
Date prepared: June 25/96

Species: Red-naped Sapsucker Date: June 20/96

Number: 1 Age: Sex: male

Locality (Exact information if possible): at Bridge #9 between Vetter Flats & Bebo Grove

Time: 11:00 AM Length of time observed: 10 minutes

Observer: LYNN VOGT + LYNDA WADDINGTON

Other Observers: LYNDA WADDINGTON

Who first saw bird?: LYNDA WADDINGTON

Who first identified bird?: LYNN VOGT

Optical equipment used: B+L 10×40

Distance to bird: 25' - 50' (it was 50' then flew closer)

Weather/Light conditions: Overcast, even lighting

Was the bird photographed?: no

Comparison species present: no

Experience with the species: yes: McKinnon Flats/Kelowna, B.C.

Voice and /or call notes: –

Was a field guide used while the bird was under observation?: ✓ If so how do you think it might have influenced your decision?: – (checked to see if there was any red on nape on YBSA)

Habitat discussion: Along Fish Creek in deciduous woods

Behavior: along Fish Creek; working old poplar wood

Are you 100% certain of the identification?: yes Are others 100% certain:

How were similar species eliminated?: The red on the nape was obvious. It was a male, with the red throat and red on forehead. The white wing patch was fairly small.

Yellow-bellied Sapsucker has a larger white wing patch and no red on the nape.

960163

DESCRIPTION: Write a detailed description. If you are not familiar with all of the terms used to describe a bird see your field guide topography page and try to describe each part of the unusual bird. Get as much information down as possible as to shape, colour, patterns, unique features, etc. SKETCH the bird and show as much detail as possible.

The bird was a Male Red-naped Sapsucker. The forehead and throat were red, as was the nape (on back of head). It had a pale yellowish belly; faint streaking down the sides of breast & flanks. The chest was black, as was the back of the bird with 2 patches of mottled ~~looking~~ black & white laddering.

The bill was long, pointed & all black. (woodpecker bill)

The malar stripe was black and was thinner at the bottom.

PROOFED June 23/98 OK JRG

GREEN-TAILED TOWHEE (*Pipilo chlorurus*), male.
Calgary: Bowmont Park
May 30, 1996
Observed from 13:55 to 17:50

Location: the base of the western side of a north-south oriented gully immediately west of the 40th Avenue entrance to Bowmont Park.

Habitat: a 25 m long patch of shrub comprising mainly choke-cherry to 1.75 m with some willows, passing higher on the slope to Wolf Willows, with occasional aspen and aspen snags to c4 m. Leafing, especially of the shrubs, was not well advanced allowing good views of the bird on many occasions as it moved and fed on the ground within the vegetation.

Description: A robust sparrow-like bird with a relatively long tail. Direct size comparisons made with a Brown Thrasher and several Clay-coloured Sparrows, compared to which it was respectively conspicuously smaller and larger.

Bill stout, apparently fairly symmetrical and uniformly grey. Head with a conspicuous rufous-brown cap extending to the nape, of a more reddish coloration than that of a Chipping Sparrow. Cap defined cleanly below by a grey supercilium. Conspicuous, squarish loral spot extending posteriorally in a thin tapering line above the eye. Eye apparently dark. Auricular patch thinly vermiculated black on grey. Chin immaculate white backed by a black malar stripe and a white submoustachial stripe. Rest of face grey.

Breast grey passing posteriorally into a dirty-white belly and under-tail coverts. Back appearing uniform brownish-grey with lighter feather fringes in strong light. These fringes showed as green scalloping in more diffuse light, and by late afternoon the back appeared generally suffused olive-green. Rump grey with no green coloration under any light.

Wing tips extending to the base of the tail. Wing coverts appeared uniform and identical to the back under all lighting conditions. Primaries in closed wing bright yellow-green, clearly contrasting with rest of wing. Alula conspicuous very pale yellow. Secondaries in closed wing grey with some yellow-green fringing.

Tail long and invariably held horizontally. Outer retrices conspicuously bright yellow-green reminiscent of the colour of the feather shafts of Yellow-shafted Flicker. Tail generally grey-green becoming more yellowish-green towards the base. When seen perched and facing the observer the feather tips appeared abraded giving the tip of the tail a ragged appearance. In flight the green tail contrasted clearly with the greyer back.

Legs initially appeared dark, but under late afternoon lighting conditions they were clearly pinkish-grey or even grey-pink. Feet not observed.

Voice: silent except for a single Grey Catbird-like "miew" call that may have been given by this bird. When first located in the morning, the bird was singing (*fide* Horst Grothman).

Habits: the bird spent most of the time scratching on the ground in leaf litter within the shrub. This scratching (usually a double scratch) was quite audible and was the easiest means of locating the bird. The bird moved by hopping surprisingly quickly through the dense shrub from one end of the patch to the other, a distance of about 20 to 25 m. During the period of observation it never left the patch. On one occasion it perched motionless on a low limb of an aspen snag, on another perched low in a chokecherry facing the observers, and was clearly seen in flight once (at 14:38) as it flew to the south from one end of the patch to the other. Other short flights low through the shrub were engendered by the over-close approach of observers. Although invariably keeping in cover, the bird was not particularly shy allowing observers to approach as close as 3 to 4 metres.

Discussion: the bird was initially located at the same site at about 08:30 by Horst Grothman, where it was seen both in the shrubbery and feeding on the ground on a newly seeded area immediately to the east in the company of two Lark Sparrows (themselves unusual birds in the Calgary area). By the end of the day the bird had been seen by at least 20 observers. The following day the bird was sought from 06:00 to 10:30 by several people but was not located.

The only previous record of the species in Alberta was a single bird present June 17, 1993 in Lethbridge seen by Ross Munro and Randy Nystrom. The bird was present in a suburban yard for 3-4 hours before being scared away by a passing merlin. Unfortunately it was not photographed nor adequately described. If accepted, the Calgary bird would be the first documented record for the Province. Ironically, Alberta is the closest area in Canada to the species' northernmost breeding range in central Montana, yet the Green-tailed Towhee has previously recorded as a vagrant in Canada in most provinces from Nova Scotia to British Columbia.

Probable Yellow-bellied Flycatcher Mt Lorette Area AB 22 August 1996

by
J.B. Steeves
1720 Bowness Rd N.W,
Calgary AB
T2N 3K2

Species
Yellow-bellied Flycatcher *Empidonax flaviventris*

Dates
Seen *ca.* 0945 to *ca.*0950 MDT of 22 August 1996. Written 22 August 1996 & computer disked 23 August with recorded taped notes of 22 August and a literature search regarding confusion species.

Other Observer
Lynn Vogt

Location
Kananaskis Country—Mount Lorette Raptor Study Area—X country ski trail just SE of main Hay Meadow.
—*ca.*50°56'N, 115°06'W.

Comparison Flycatcher
Dusky Flycatcher *E. oberholseri* — one or two

Noted
Generally: A fresh plumaged Empidonax flycatcher having a bright yellow ventral surface.
Head: *Entire head*—yellowish-green having a slight peaked appearance. *Bill*—appeared dark. *Eye*—dark. ***Eye-ring*—very prominent, white, wide, and of equal width.**
Dorsally: *Mantle*—olive green. *Back*—olive green. *Tail*— slight notch. *Wings*— two prominent wide white wing bars of equal width. *Primaries*—black and fringed or edged thinly light. *Tertials*— darkish and strongly fringed light.
Ventrally: Entire surface from *upper breast* to *vent area*—bright greenish-yellow. *Tail*—slight notch and darkish.

Sketch showing typical eye-ring shapes

Habits
Very noticeable on alighting was the **fast rising of tail** and a slightly slower lowering. Constantly feeding from high up to low down in Aspen Grove trees.

Habitat
Fairly mature Aspen Grove near left bank of Kananaskis River.

Possible Confusion Species
Western Flycatcher Group i.e.*occidentalis* & *difficilis*—the most likely—breeding territory is nearby.

•Farrand (1983) under Western says that its "almond-or teardrop-shaped eye-ring is diagnostic." In addition he says "They flick their **wings and tails** simultaneously, giving these birds a nervous appearance like Hammond's." Under Yellow-bellied he indicates that **"normally only flicks tail."** and that "many Westerns **lack bright yellow underparts**."

•Kaufman (1990) under Western has an olive-green back, mentions the distinctive eye ring but **says usually**—wing **dusky** not blackish—wing bars usually dull white—in fresh juvenile plumage have noticeably **buff wing bars**—some show **no yellow on throat** in early fall—usually active—flicks tail frequently while perched and often flicking the wings at the same time. Comparison of *Western* & *E. f.*—a challenge: ***E.f.*** stronger green tones, **blacker wings** leading to contrast with white wing bars and tertials, eye-ring even thickness but highly variable, shorter tailed, round headed. **Western** dull green above and buff or brownish below.

Comments
At the time of sighting we believed that the eye-ring as described under Noted was diagnostic for *E.f.* But The Literature does not clearly state that Westerns can't have such an eye-ring. In other words it appears that there is a small element of doubt regarding this field mark as diagnostic. A look at many museum specimens might clear this field mark for a positive identification. A number of other field marks given by Farrand and Kaufman point to *E.f.*

Equipment/Conditions
x10 binoculars, to *ca.* 6 m., *ca.* 13C, front lit for most part, 5 % cum., < 5 km wind.

Species: Yellow-bellied Flycatcher Date: AUGUST 22/96

Number: 1 Age: – Sex: –

Locality (Exact information if possible): Kananaskis Country - Mt. Lorette area; ¼ - ½ K/M. north along Hay Meadow Trail (on east side) along river

Time: 10:30 AM Length of time observed: 5 minutes, off & on.

Observer: Lynn Vogt

Other Observers: Jack Steeves

Who first saw bird?: Jack Steeves

Who first identified bird?: Jack Steeves

Optical equipment used: 10x40 B+L. (L.V.)

Distance to bird: 12 feet - 45 feet.

12°C 15°C Weather/Light conditions: ~~Soft~~ morning full sun; front lit / NO wind.

Was the bird photographed?: –

Comparison species present: DUFL

Experience with the species: Jack Steeves - yes Lynn Vogt - no

Voice and /or call notes: –

Was a field guide used while the bird was under observation?: – If so how do you think it might have influenced your decision?:

Habitat discussion: in deciduous poplar; 8 - 30' above ground

Behavior: moving around feeding in mixed flock of Chickadees warblers

Are you 100% certain of the identification?: ✓ Are others 100% certain: ✓

How were similar species eliminated?:

The sulphur yellow underparts of this bird were very bright, contrasting with the lemon / bright green on the back & head

Western Flycatcher eliminated:
- eye ring not tear-drop shape
- no brown / olive or brown color on bird at all
- all yellow underparts on this bird (YBFL)

960170

the YBFL lifted its tail upon alighting - the movement was a fast lifting of the tail, then slowly lowered the tail

Head - green, with dark eye that had a completely circular eye ring (whitish eye ring).
Bill - wide at base. Lower mandible - orange (pale)
Upper mandible - dark; ~~mandibles~~ fairly large bill.

Ventral - all sulphur yellow underparts, including throat, breast, belly, undertail coverts.

Dorsal - wings : dark green / black
: 2 bold white wing bars.

mantle : green (strong, bright)

tail : short
: green - much same green as mantle.

Habitat : mixed deciduous / coniferous along X-country ski trail (Hay Meadows trail - east side)

Was the bird photographed?: –

Comparison species present: YRWA / YEWA

Experience with the species: saw speciman Monday August 19/96

Voice and /or call notes: –

Was a field guide used while the bird was under observation?: no If so how do you think it might have influenced your decision?:

Habitat discussion : in coniferous trees: flew to other coniferous tree all the time keeping 2-3 feet above the ground.

Behavior:

Are you 100% certain of the identification?: ____ Are others 100% certain:

How were similar species eliminated?:

– this is only fall warbler I am aware of with this chestnut/warm brown down the sides & flanks

– ruled out CSWa (Chestnut Sided) as wing bars were very clear white color as were underparts.

– I didn't see any green/olive green on this bird.

960171

DESCRIPTION: Write a detailed description. If you are not familiar with all of the terms used to describe a bird see your field guide topography page and try to describe each part of the unusual bird. Get as much information down as possible as to shape, colour, patterns, unique features, etc. **SKETCH** the bird and show as much detail as possible.

Head - not seen

Ventral - buff/white clean underparts from chin to undertail coverts
- chestnut (warm brown) color on sides, flanks present.

Dorsal - Wings - dark brown primaries + secondaries or black
- 2 large white wing bars
Mantle - heavily streaked (dark brown streaking) on back on top of gray/brown tone of mantle

Tail - appeared long
- darker than back, appearing dark gray/brown or black
Legs - brownish (not light or yellow)
- blended in with back of bird

PROOFED May 5 '98 OR

Please enclose original field notes or copy of notes. Please delay reference to books until sketches and description complete.

Species: MOURNING WARBLER Date: AUGUST 22/96

Number: 1 Age: – Sex: –

Locality (Exact information if possible): along willow hedge row in (boggy area) Mt. Lorette Natural Area (near ponds); Kananaskis Country.

Time: 12:45 P.M. Length of time observed: 1-2 minutes

Observer: LYNN VOGT

Other Observers: JACK STEEVES

Who first saw bird?: both saw it same time; but viewed different parts of bird

Who first identified bird?:

Optical equipment used: 10X40 B+L (L.V.)

Distance to bird: 15 feet - 20 feet

25°C Weather/Light conditions: Sunny, back lit but bird in shade at base of willows

Was the bird photographed?: –

Comparison species present: COYE/YEWA/WINA/MacG. Warbler nearby

Experience with the species: –

Voice and /or call notes: –

Was a field guide used while the bird was under observation?: – If so how do you think it might have influenced your decision?: –

Habitat discussion: in base (on ground) of willow shrubs, hopping

Behavior: around from 1 low branch to ground, then up again

Are you 100% certain of the identification?: ____ Are others 100% certain: ____

How were similar species eliminated?:

Connecticut Warbler – because they walk on ground

MacGillivray Warbler – eye ring was more complete not broken

BLUE-WINGED WARBLER

Vermivora pinus

August 18, 1996

Inglewood Bird Sanctuary, Calgary, Alberta

ENTERED June 12/98 Jm

PROOFED June 23 98 OD

Over the weekend of August 17 and 18, 1996, I was visiting an old high school buddy in Calgary. Alas, he is not a birder, so I went off on my own on the morning of the 18th to scope out the local avifauna. I'd visited Calgary the previous November and was impressed by the migrant potential of Inglewood Bird Sanctuary, Carburn Park, etc., and decided to visit one of these-- namely Inglewood. When I arrived around 8 AM, there were some birders gathering for a field trip in the lot. I waved to them but decided to continue on. It was a fairly chilly morning, and for the first half hour or so, the birding was somewhat slow. Then, towards the sanctuary's southern end, I came across a group of birds. There were some Baltimore Orioles and Tennessee Warblers, both of which I don't get to see in Washington, so I was pretty happy. It was this kind of stuff that really had urged me to go out that morning. I was pishing at the flock, when a bright yellow bird popped into the open no more than 20 feet away. I raised my bins, looked, and thought, "Oh, a Blue-winged Warbler, how *nice* -- wait, I'm not in Florida or Chicago, I'm in Calgary. Holy Cow! This has got to be ***rare*** here." I shot my bins up again and studied the bird much more intently.

The bird in question was roughly the size of a Tennessee Warbler. It had bright yellow underparts, excepting white undertail coverts. The wings were a dull blue-gray with bright white wingbars. The back, nape, and cap were moderately bright green with a yellowish tinge. The forehead was bright yellow, like the underparts. Through the eye, there was a blackish line. This line included the lores and extended just behind the eye. The eye and bill were dark and may well have been black. The bill was thin and short, typical of most warblers. The rump and tail color/pattern were not noted. Leg color was not noted.

In short, this bird was a typical female (or bright immature) Blue-winged Warbler. I've seen a number of these from my years living and birding in the eastern U.S. Also, I visit the eastern U.S. annually during migration (mostly to enjoy landbird

960173

migration), and usually see a couple Blue-wings. No other species really resembles the description above. A Blue-winged X Golden-winged Warbler hybrid (especially backcross) potentially could, but one would expect yellowish wing bars, more extensive white underparts, abnormally placed dark on head, or some other atypical feature.

I observed this Blue-winged Warbler over about five minutes with 2+ minutes of actual viewing time. The sky was high overcast. Viewing distance was 20 to 40 feet. I was using 10X40 Swarovski binoculars. The time of the sighting was about 9 AM. After I lost sight of the bird, I realized that most of the flock had dissipated, and I had little idea of where the birds had gone. I took off in search of the group I had seen gathering in the parking lot roughly an hour before. I had walked about 100 yards and saw them peering off into the woods. I quickened my pace and approached saying, "I just saw a Blue-winged Warbler."

The leader turned to me, smiling, and said, "THAT's what that was. A mostly yellow bird with bold white wingbars and a black line through the eye. Right." Right indeed. Apparently, that was the direction my quarry had taken. Unfortunately, none of his group had gotten on the bird, and at least for the ten minutes I hung around, we couldn't relocate it. I left the group, told the gentleman had the new visitor center about the warbler, and called the hotline. The group leader, John Riddell, had told me that he would also spread the word. He agreed with the bird's ID. I don't know if anyone else saw the bird later in the day.

Steven Mlodinow
11311 19TH Ave SE
C317
Everett WA 98208

Dear Mr Halladay,

I'm a Washington birder who was visiting Calgary in August. I went out birding on the morning of the 18th and found a Blue-winged Warbler at Inglewood Bird Sanctuary in Calgary itself. The bird was later seen by at least one other birder-- John Riddell. I've enclosed my documentation.

I'm an experienced birder of 20+ years. I've seen a number of Blue-winged Warblers and am comfortable with their ID. My birding "resume" includes one book published, Chicago Area Birds, and another that will be out on the shelves within a month (America's 100 Most Wanted Birds). I'm currently vice-president of the Washington Ornithological Society. Any questions regarding my reliability can be directed to Bill Tweit (WA Field Notes editor) or Guy McCaskie (So California FN editor). I put this forth not in attempt to awe anyone, but rather in an effort to reassure you that i am not some yahoo who wandered a bit east from Washington, looked at a goldfinch, and called it a Blue-winged Warbler. I'd be delighted to answer any questions that you might have.

Sincerely,

Steven Mlodinow

Maivia

Sighting by Dennis + Helen GEORGE - 1334 Windsor St. N.E.

~~Sunday~~ May 19/96 - 5:30 p.m.
- sighting of single Bay-Breasted Warbler,
(through front bedroom window - alt. 6-8 ft
distant) - my wife Helen first ~~saw~~ saw the bird ~~on our~~ perched on
our planter (on our front steps) + at first
thought it might be an oriole because of
the bright orange breast! After I arrived
to look out the window (almost immediately)
it had flown up into our large Spruce tree,
but then it dropped down to the ground
under the tree + hopped about eating
grass seeds? I only saw the bird from
the back + sides (couldn't see most
of its orange breast...) but noted the
rich, deep chocolate coloration of its
head, back + sides. It was about
the size of a Sparrow (- possibly a
little larger + plumper) quite active,
had two prominent wing-bars + a
few small, white speckles throughout
its "chocolate" coloration.
Bird was observed for 30-45 secs. at very
close range.

Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet if needed).

* I have never before seen a loon on this slough.

C.F.N.S.

Bird Record Sheet

My colour code ♂ ♀ (young or immature) ?

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

RECORD FORM
FOR
UNUSUAL BIRD SIGHTINGS

ENTERED Apr 28/98 JDC
PROOFED 21 May 5 '98 OR

NO FIELD NOTES TAKEN.

Please enclose original field notes or copy of notes. Please delay reference to books until sketches and description complete.

Species: WHITE-FACED IBIS Date: JUNE 6/96
Number: 1 Age: UNKNOWN, BUT ADULT PLUMAGE Sex: UNKNOWN
Locality (Exact information if possible): ~~[illegible]~~ KININVIE MARSH, SOUTH OF TRANS-CANADA HIGHWAY, EAST OF TILLEY ALBERTA. (over)
Time: 3:30 PM Length of time observed: APROX. 15 MINUTES.
Observer: DWIGHT P. KNAPIK
Other Observers: NONE.
Who first saw bird?: DWIGHT P. KNAPIK
Who first identified bird?: DWIGHT P. KNAPIK
Optical equipment used: 7.5 x 42 BINOCULARS + BUSHNELL SPOTTING SCOPE
Distance to bird: APROX. 50 METRES.
Weather/Light conditions: WARM, CLEAR DAY. GOOD VISIBILITY.
Was the bird photographed?: NO.
Comparison species present: FEEDING WITH SHOVELLORS, PINTAILS, COOTS.
Experience with the species: I'VE SEEN IT BEFORE IN TEXAS ~~[illegible]~~.
Voice and /or call notes: NONE.
Was a field guide used while the bird was under observation?: YES. If so how do you think it might have influenced your decision?: IT VERIFIED MY INITIAL IMPRESSION
Habitat discussion : SHALLOW PRAIRIE CATTAIL MARSH.
Behavior: PROBING BELOW WATER SURFACE + WALKING AROUND.
Are you 100% certain of the identification?: YES. Are others 100% certain: —
How were similar species eliminated?: BY REFERRING TO NATIONAL GEOGRAPHIC FIELD GUIDE TO BIRDS OF NORTH AMERICA + PETERSON FIELD GUIDE TO WESTERN BIRDS. THE WHITE BORDER AT THE BASE OF THE BILL WAS VERY EVIDENT + THE ALL-RED LEGS WERE QUITE VISIBLE. THEY HELPED ME ELIMINATE GLOSSY IBIS.

960183

DESCRIPTION: Write a detailed description. If you are not familiar with all of the terms used to describe a bird see your field guide topography page and try to describe each part of the unusual bird. Get as much information down as possible as to shape, colour, patterns, unique features, etc. **SKETCH** the bird and show as much detail as possible.

LOCATION: The ibis was seen in the area of the marsh where the road starts going into the marsh over the dyke. I had to stop because there were markers indicating the road was impassable. The ibis was on the right-hand side (west), feeding in shallow water.

The bird's size was evidently larger than the pintails, shovellers coots, and ruddy ducks around it. The dark plumage showed glossy green + chestnut as it moved around. The long curved beak was reddish, with the white border evident at the base of the bill. The red legs were also quite evident. It moved around in shallow water, probing below the water surface. The longer legs allowed it to stand above the water and the water fowl around it. I took a walk around, looking for other individuals, but didn't see any others. When I returned, the bird was no longer there, and I could not locate it again.

Bird Record Sheet

MAY BIRD COUNT

1996

TOTAL SPECIES = 30

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

NOTES SECTION: (attach separate sheet if needed).

Red grebe & Eared grebes were preparing nests @ lake north of Black Springs. Common loon was on nest while the partner was swimming close by — loon nest was easily seen from hill above the water. Canada geese = large flotilla of geese — 10-20 in group. Coots on nests & preparing nests — 18 young yet.

Great Egret stayed in same spot south of the "lake" for the first time, we saw three — one loon.
