ENTER

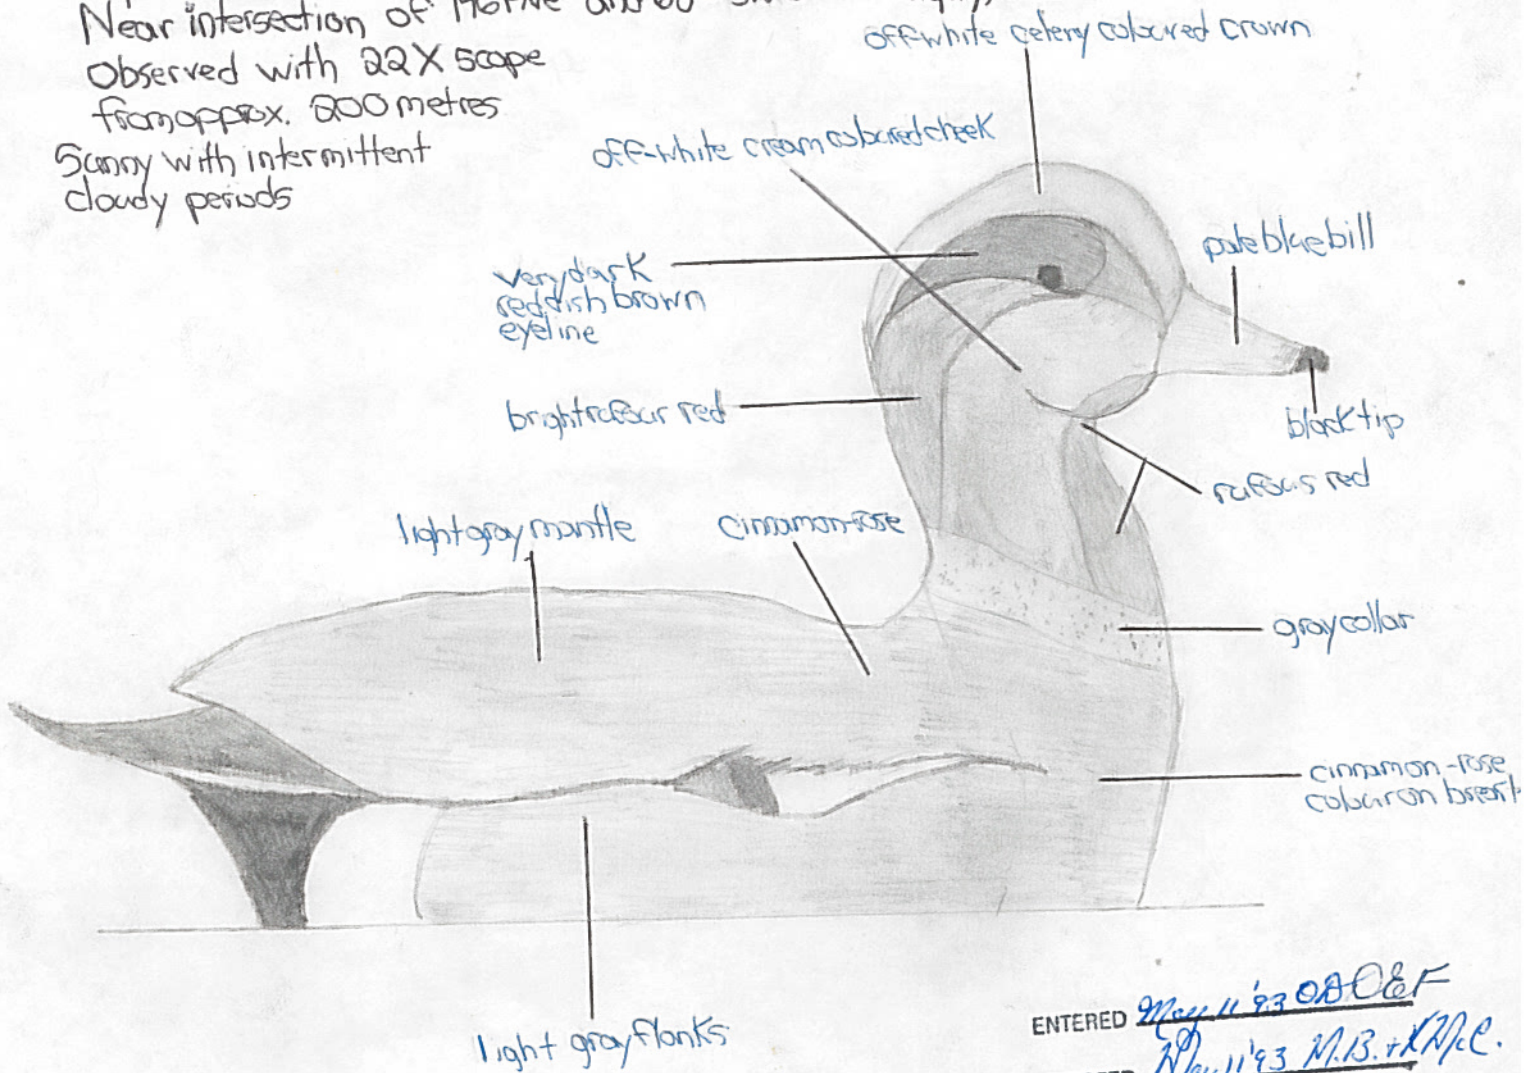

♂ Eurasian - American Wigeon hybrid

April 6, 1993 1610 - 1635 MDT

Near intersection of 146 Ave and 68th St. S.E. Calgary, AB.

Observed with 22X scope

from approx. 200 metres

Sunny with intermittent
cloudy periods

ENTERED May 11 '93 O&F
 PROOFED May 11 '93 M.B. & K.P.C.

- observed feeding, swimming and briefly in flight
- associated with ♂ A. Wigeons for entire observation period
- ♂ E. Wigeon also observed on same slough, but no interaction took place
- head and neck were noticeably darker than surrounding ♂ A. Wigeons
- body shape and bill identical to Wigeons
- broad, reddish brown eyeline observed - darker than surrounding rufous red - in same position as green eyeline of ♂ A. Wigeon
- bright rufous red on neck similar to colour on head of ♂ E. Wigeon - observed only in certain angles and light conditions
- rufous red also observed on throat
- creamy off-white colour observed in cheek area - similar colour on crown of ♂ E. Wigeon - extent of colour varied on each side of head - paler colour also observed on crown
- gray collar observed - similar to gray on head of ♂ A. Wigeon
- cinnamon-rose colour on breast - gradual gradation to light gray along flanks
- mantle not well observed but probably light gray

SUBMITTER:

SEND TO: C.F.N.S. - Bird Records

ADDRESS:

P.O. BOX 981

PHONE:

Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet if needed).

1) not adult-plumaged birds; breast plumage variably streaky and blotchy; white line to facial disc not present. Two birds sitting on fenceposts; one bird out in field.

E1000P

C.F.N.S.
Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

NOTES SECTION: (attach separate sheet if needed).

This bird was probably a male of the Columbian 'monarch' warbler, darker blue than Richard's, darker cap, heavy brown breast, rather rather than reddish-brown, dark underparts, not green, but was in a pine forest in a marsh, ditching, a male. Bunting had the same plumage, a moment's note resembling its partner was gone, left flying north, calling as it flew.

SEND TO: C.F.N.S. - Bird Records

ADDRESS:

P.O. BOX 981

PHONE:

Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet if needed).

① One bird on the nest about 30 feet up in a tree near a farm house
 ② All the Golden-crowns were adults and probably male (only one female noted). Although altitude was very high, it had perfect vision and almost all came right over the brow of the valley and flew straight across the valley past Mt. Zorilla. The one unidentified was very high and its already noticed notification of flight was very small for an Eagle but too large for a Hawk. However, the bird was by the a white band to the base of the tail which would indicate imm. Golden-crown.

C.F.N.S.
Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

NOTES SECTION: (attach separate sheet if needed).

Observed all eagles appeared to be immature males. Sighting conditions excellent. Moderate S.W. winds; weather same as 03/20/43 - came over brow of Old Baldy and paralleled over hill and fox. Route - slight difference - 03/20 eagles were passing very near summit of Old Baldy. Under heavy forest perhaps 2500 metres above it. Fine red-tailed hawk light phase and actually, I did not follow along Old Baldy. Fine downy, probably a female Sharp-shinned. Flashed thru the valley in a S to N line about halfway up Old Baldy.

ADDRESS:

PHONE:

SEND TO: C.F.N.S. - Bird Records

P.O. BOX 981

Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet if needed).

Only 3 birds were dark enough to be light-phase - some birds on territory, some migrating (estimate 40% migration)

C.F.N.S.
Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK "*" (ie: field marks, habitat, voice, behavior).

C.F.N.S.
Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK * (ie: field marks, habitat, voice, behavior).

Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
o Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

NOTES SECTION: (attach separate sheet if needed).

- Saw 1 ~~buff-breasted~~ just east of Port entrance from South

(did not see the ♂ cardinal but Harry Glesner had seen it the Friday before (Feb. 12th, 1993))

* Northern Cardinal ♀ observed the ♀ at the feeder from 4:47 to 5:52 - it flew in with 4 or 5 ~~stirring~~ ~~pin~~ ~~quarrels~~, quite timid + nervous, very pretty golden + rufous crest + bright red beak. good look

C.F.N.S.
Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
 o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
 o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
 o Provide more details in "Notes Section" on species marked with an ASTERISK * (i.e. field marks, habitat, voice, behavior).

C.F.N.S.
Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK * (ie: field marks, habitat, voice, behavior).

Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK * (i.e. field marks, habitat, voice, behavior).

UNUSUAL BIRD SIGHTINGS

Please enclose original field notes or copy of notes. Please delay reference to books until sketches and description complete.

Species: CARDINAL Date: APRIL 27-1993
Number: 1 Age: ? TO YOUNG Sex: MALE
Locality (Exact information if possible): 4 3/4 MI N. OF HIGHWAY 53
AND 3 MI. W. FROM T97
Time: 7:30 AM Length of time observed: 2 HRS
Observer: GABE PAQUETTE
Other Observers: SYLVIA PAQUETTE
Who first saw bird?: GABE PAQUETTE
Who first identified bird?: SYLVIA PAQUETTE
Optical equipment used: EYE GLASSES
Distance to bird: 15 TO 20 FEET
Weather/Light conditions: CLEAR - EAST SIDE HOUSE - FULL SUNRISE
Was the bird photographed?: NO
Comparison species present: BLUE JAYS - HARRY WOODPECKER - DOWNY WOODPECKER
Experience with the species: NONE OTHER THAN XMAS STAMPS
Voice and /or call notes: DON'T RECALL EXACTLY NOW, BUT I COULD IMITATE THEN.
Was a field guide used while the bird was under observation?: YES If so how do you think it might have influenced your decision?: NONE - BIRD WAS NOT IN GUIDE
Habitat discussion: POPPAR BUSH. SPRUCE - ROSE BUSH SAKATOON ETC
Behavior: LEW FROM TREE TO GROUND LOOKING FOR SEEDS.
Are you 100% certain of the identification?: YES Are others 100% certain: YES
How were similar species eliminated?: NO OTHER SIMILAR SPECIES PRESENT - ONLY BIRD WITH THAT MUCH RED.

← THIS IS WHAT BIRD LOOKED LIKE.
EXCEPT MAYBE BILL WAS LIGHTER COLOR TO YELLOW.

ENTERED July 7/93 J&K
PROOFED July 20/93 (D) DY

930064

DESCRIPTION: Write a detailed description. If you are not familiar with all of the terms used to describe a bird see your field guide topography page and try to describe each part of the unusual bird. Get as much information down as possible as to shape, colour, patterns, unique features, etc. SKETCH the bird and show as much detail as possible.

FIRST. NOTICE BIRD WAS RED. [BRIGHTER RED THAN
A ROBIN BREAST.

SECOND. NOTICE DARK (BLACK) AROUND THE BEAK.
BEAK WAS A LIGHTER COLOR.

THIRD. NOTICE CREST ON HEAD.

LOOKED LIKE A YOUNGER BIRD (1-2 YRS)
WAS NOT FLIGHTY - STOOD ON GROUND & WATCHED US.
HOPPED ON GROUND UNDER BIRD FEEDER LOOKING
THRU SPILT SEEDS ON GROUND.

NOTES

THERE SEEMED TO BE DARKER COLOR ABOUT BACK & WINGS WHEN BIRD WAS AT REST.

HE THEN FLEW UP INTO TREE TOPS (40-60 FT.) WHEN I WENT OUT TO DO CHORES. HE THEN FLEW FROM TREE TO TREE, RESTING + SINGING OR CALLING AT EACH STOP. HIS CALL WAS ONE I HAD NEVER HEARD FROM ANY BIRD BEFORE. IT WAS A FOUR NOTE CALL THUS: $\uparrow$ — — — THE FIRST NOTE HIGH AND THE OTHER THREE FLAT + LOWER.

HE HEADED SOUTH. IN THIS MANNER, I OBSERVED HIM FOR ABOUT AN HOUR. THEN THAT WAS THE LAST I SAW HIM. AND HAVENT SEEN ANY SINCE, ALTHOUGH WE HAVE BEEN WATCHING.

I HOPE THIS ALL IS OF SOME HELP.

Mike Pagneth

Time: 6:00 PM Length of time observed: AT LEAST 1/2 HOUR
Observer: GWYNN CHOREL
Other Observers: MARCEL CHOREL - (NO ONE ELSE WAS NEAR LAKE,
Who first saw bird?: GWYNN CHOREL
Who first identified bird?: GWYNN CHOREL
Optical equipment used: 8 X 42 Multicoated 114/1000M Magnicon A-1.
Distance to bird: 30-40 meters, then dived & resurfaced much further out.
Weather/Light conditions: CLEAR, NO WIND, WARM EARLY EVENING
Was the bird photographed?: NO. By timer camera, was ready, loon had dived and
Comparison species present: NO resurfaced too far out for worthwhile
photo with a 35mm lens.
Experience with the species: HAVE SEEN AND HEARD COMMON LOONS MANY TIMES.
Voice and /or call notes: NEVER BEFORE, HAVE WE SEEN A LOON WITH YELLOW
BILL.
Was a field guide used while the bird was under observation?: Yes If so how do you
think it might have influenced your decision?: CONFIRMED IT
Habitat discussion: PRAIRIE FRESHWATER LAKE
Behavior: TYPICAL LOON, EXCEPT BILL TILTED UP. SWAM VERY LOW IN WATER.
Are you 100% certain of the identification?: Yes Are others 100% certain: MY HUSBAND, YES
How were similar species eliminated?: _____
NO OTHER LOON HAS YELLOW BILL

DESCRIPTION: Write a detailed description. If you are not familiar with all of the terms used to describe a bird see your field guide topography page and try to describe each part of the unusual bird. Get as much information down as possible as to shape, colour, patterns, unique features, etc. SKETCH the bird and show as much detail as possible.

at first glance - a common loon. Then tilt of the head is noticeable, and pale bill stands out. Use of binoculars reveals also a humpier head than common loon.

Ross,

I saw the Oldsquaw's on Cutbank Lake just northwest of Saskatoon^{Lake} Provincial Park. Two birds, male and female in summer-plumage. May 14, 1993 around 7:00PM at east end of lake. Weather was cool, slightly overcast. The Mew Gulls were near by. Three birds bobbing amongst the Franklin Gulls.

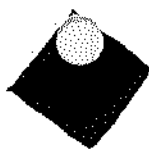

(Grande Prairie area)

NOTES SECTION: (attach separate sheet if needed).

Col 1 - Set on weathervane, then moved to 3 different positions in various trees all the while sitting with neck outstretched as if peering at something in spruce tree. After owl was chased away, a ~~phoenix~~ ^{phoenix} approached a ground feeder near the spruce. Wind SW at 10 mph. 7°F.
Col 2 - Sitting on roadside, then flushed to stubble field. Foggy 4°F. Wind NE 25 mph.
Col 3 - Sitting on power pole at Kehoe L. dam. Clear, 8°F, Wind NE at 20 mph.
(Observer doesn't describe method of aging bird, but likely it was quite dark, indication of young female) ← editor note

P.O. BOX 981
Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet if needed).

Col 1 - perched on fencepost. Clear, sunny, 16°F, wind SW at 25mph. (Bird said to be "immature", probably means dark plumage or young female - editor note)

Col 2 - sitting in tree. Clear, sunny, 52°F, wind SW at 15mph. Snow patches only. (see above)

Col 3 - "immature" - appeared thin & very small. Sitting on sign post. Wind S at 15mph, 33°F. Some snow on ground.

(Editor's note - while I do not question observer ability, size may only indicate immature males which are much less common in our area than are either young females or adult males.)

RECORD FORM
FOR
UNUSUAL BIRD SIGHTINGS

Please enclose original field notes or copy of notes. Please delay reference to books until sketches and description complete.

Species: Sabine's Gull Date: May 23 & 24, 1993
Number: 1 Age: adult Sex: unknown
Locality (Exact information if possible): Wyndham/Carseland Prov. Park
along Bow river between weir & hwy 24 bridge
Time: 4:15(23rd) 3:30(24th) Length of time observed: 30 min(23rd) 45 min(24th)
Observer: Howard Troughton
Other Observers: not aware of any others
Who first saw bird?: Same
Who first identified bird?: Same
Optical equipment used: 8x40 EW Minolta binoculars
Distance to bird: about 100 feet
Weather/Light conditions: Sunny, both days observer between bird and sun
Was the bird photographed?: no didn't have camera
Comparison species present: Franklin's Gull
Experience with the species: no previous experience
Voice and/or call notes: none
Was a field guide used while the bird was under observation?: no If so how do you think it might have influenced your decision?:
Habitat discussion: water
Behavior: see attached
Are you 100% certain of the identification?: yes Are others 100% certain: N/A
How were similar species eliminated?: there are no other similar gulls.

The yellow-tipped black bill, lack of eye ring, and white-grey- and black upper wing pattern are unique to North American gulls.

PROOFED July 30 '93
Please re-enter on sheet #6

930077

DESCRIPTION: Write a detailed description. If you are not familiar with all of the terms used to describe a bird see your field guide topography page and try to describe each part of the unusual bird. Get as much information down as possible as to shape, colour, patterns, unique features, etc. SKETCH the bird and show as much detail as possible.

Black hood. No obvious eye ring, ~~dark~~ dark eye made the face appear uniformly dark in contrast to Franklin's, which have ^{partial} white eye ring. Black bill with yellow tip (as though dipped in mustard). Mantle grey but slightly paler than similar Franklin's. On sitting bird, wing tips extended out further than on Franklin's and showed a more striking black-and-white pattern (see diagram). Legs dark, shorter than Franklin's. In flight, wing pattern very distinct, showing grey-white-black "wedges".

Tail forked like Tree Swallow,  all white.

At all times was within 2 feet of a Franklin's gull, making direct comparison easy. When sitting in water, noticed that head was lower than tips of primaries, giving it a "no-necked" appearance in contrast to Franklin's. Generally the bird had a more delicate build and look than the Franklin's, which is a chunky bird.

Behaviour & additional notes

(2)

Bird first seen at about 4:15 PM on May 23rd, 1993 ~~and~~
(across from campsite 89)
standing on gravel bar in Bow River in company of about
10 Franklin's Gulls. Attention was first drawn to the bird
because of the pattern on wing tips which were longer and
more patterned than on Franklin's. At that point the bird's
bill was hidden. As I was observing it, it turned its head
and the yellow-tipped bill was noticed. I then started to get
excited because I knew it was different. I waited for almost
30 minutes for the bird to fly so that I could see the
upper wing pattern. I then rushed off to phone the rare bird
phone around. The bird seemed reluctant to fly and was quite
content to just sit around. ~~It then sat~~ Although it was in the company
of Franklin's there was no obvious interaction between it and
the others. It was not until a Crow landed on the gravel bar
that it flew off, only to return after a minute. I went out
again at around 8 PM but could not locate it. The following
morning there was not a single black-headed gull on the
water. ~~The following~~ That afternoon while I was at Johnson's

2 OF 4

Nicholls v. Nicholls Alta. Q.B. (Calgary), March 5, 1991 [1991] A.J. No. 217. CHILD SUPPORT & COSTS RESERVED RE DIVORCE GRANTED OCT 31/90 - BOTH SUPPORT & ACCESS WERE CONSENTED TO IN MINUTES OF SETTLEMENT DATED NOV 17/89. Divorce - 2 sons and 1 daughter. Father sought decrease in child maintenance. Several financial reasons were given by judge in reducing child support (from 50%) to 40% of net. Specific reference was also made to enmity and bitterness flowing out of matrimonial breakup & Trial Judge cautioned mother that continuation of her abusive conduct "will undoubtedly, and deservedly, lead to maintenance reduction or other applications." ACCESS - Very limited supervised access was given to the father according to previous Minutes of Settlement. This was referred to although no variation as to access seems to have been requested. Trial Judge also referred to the fact that access as prescribed by the minutes was to

"continue subject to a variation based on a review of a psychiatrist or psychologist in respect to the access" and with the parties agreeing "that they will be bound in respect of variation of the access as set out hereinbefore by the psychiatrist or psychologist recommendation, subject always to the Court's inherent jurisdiction"

and implied that access provisions related to a breakdown that the father had suffered in the spring of 1989.

3 OF 4

Desjardines v. Desjardines Alta. Q.B. (Edm.), Jan. 3, 1991 [1991] A.J. No. 4. UNILATERAL TERMINATION OF LOCO PARENTIS RETROACTIVE TO TIME OF DIVORCE AND CANCELLING ALL CHILD FURTHER SUPPORT PAYMENTS - INTERMITTENT ACCESS PRIOR TO DIVORCE. Divorce. Child of wife by previous relationship was 2 yrs old at the time of marriage. Married 1980, separated 1983, short reconciliation 1984. Husband never adopted the child but did stand in loco parentis. Some access shortly after separation but that ceased in 1985 due to mother, the decision also states that "[t]he applicant saw the child briefly in 1986 but noting that the child appeared to fear him attempted no further contact." Divorce and matrimonial trial 1987. "While both parties are in seeming agreement that the applicant terminated the status by his conduct, if not expressly prior to the divorce, both allowed the trial judge to proceed on the basis that the status was continuing at the time of the divorce." Child support of \$200/month was ordered. Husband was not awarded access but was given leave to apply (suspect he never asked for access). The decision was never appealed. No payments were ever made.

(3)

Island, I again spotted the bird. This time it was floating down the river (downstream of the weir), presumably feeding, I would ~~travel~~ float about 300 feet and then fly upstream and repeat the process. There were also a couple of hundred ~~Franklin's~~ and also some ~~Ring-billed~~ and ~~California Gulls~~ engaging in the same activity. I presume that there was an insect hatch and the gulls were gorging on these. ~~III~~ Again there appeared to be no interaction between the Sabine's gull and the others. I watched it off and on for about 45 minutes (3:30-4:15 PM) and then returned to my campsite. I looked for the gull ~~at~~ later in the day but never relocated it. I suppose that on the 23rd it was resting up and on the 24th was feeding to supply energy to continue its northward migration, although I have no proof of this.

ISSUES RE ACCESS PROBLEMS AND APPLICATIONS TO VARY

This is a summary of the relevant cases found in the context of a search of the Alberta Judgments database of QuickLaw, a type of computerized version of an unedited caselaw reporter. The case summaries are prefaced by a brief description of the methodology, a brief overview of the issues that appeared and a possible explanation for the surprisingly small number of cases.

What we were hoping to find

The search was to try and ascertain which themes recur in the area of access problems in the family law area, specifically with reference to obtaining, varying or enforcing access.

The time frame

A two year period from October 1989 to September 1991. The search was split into five: the 4th quarter of 1989, all of 1990, and the 1st, 2nd and 3rd quarters of 1991, respectively. The only difference in the question asked was the time frame covered.

The question

The question was worded to include all cases, within the timeframe, that referred both to the word "child", in any of it's forms, and either of the words "access" or "visitation". Since the Alberta Judgments database also includes all cases from the Northwest Territories the search was limited exclusively to "A.J.". A sample search question is listed below as it was typed into QL.

CHILD! & ACCESS VISITATION & @3 A.J. & @4 1989 & OCTOBER NOVEMBER
DECEMBER

What the search turned up.

Discounting duplicates and irrelevant cases a total of 27 cases came up.

Of these 27 cases, access was a really non-issue for 15 of them. Those decisions focussed mainly on other things such as support or matrimonial property settlements and access was only briefly alluded to or mentioned in conjunction with access.

C.F.N.S.
Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

RECORD FORM

FOR

USUAL BIRD SIGHTINGS

ENTERED

PROOFED

Aug 31 93 OED J&F

Please enclose original field notes or copy of notes. Please delay reference to books until sketches and description complete.

Species: Albino - White Robin - Turdus migratorius Date: July 5, 6, 7/93
Number: 1 Age: Young fledgling Sex:
Locality (Exact information if possible): 1912 - Georgia St. S.W., Calgary, Alta, T2E4N2
Monday - first sighted - observed - 5 min. Wednesday - observed in backyard, 10 min.
Tuesday - 2nd sighting - 10 min. Took 1 photo - 20 prints.
Time: 9: AM - Length of time observed: Total - 25 min.
Observer: Jeanette McClelland - Brookes - 3 sightings - Bert Beekhof - last sighting
Other Observers: - Bert Beekhof - Albert Brookes in flight - July 6/93
July 7/93
Who first saw bird?: Jeanette McClelland - Brookes.
Who first identified bird?: Jeanette.
Optical equipment used: Eye - 1st sighting - Contax Camera - 300mm lens -
(Tamron)
Distance to bird: 8 ft. on last sighting.
Weather/Light conditions: Excellent.
Was the bird photographed?: Yes.
Comparison species present: Day 1 - alone Day 2 - with 3 others + 1 parent Day 3 - alone
Experienced with the species: lifetime of observation - recognized chirping and preening behavior
not
Voice and /or call notes: yes - normal
Was a field guide used while the bird was under observation?: not If so how do you think it might have influenced your decision?:
Habitat discussion: Nest - 6 houses away in a birch tree
Behavior: Recorded by Photography.
Are you 100% certain of the identification?: Yes Are others 100% certain: Yes.
How were similar species eliminated?: No question - Photographic Proof.

930079

DESCRIPTION: Write a detailed description. If you are not familiar with all of the terms used to describe a bird see your field guide topography page and try to describe each part of the unusual bird. Get as much information down as possible as to shape, colour, patterns, unique features, etc. SKETCH the bird and show as much detail as possible.

This Albino Robin is totally white and has red eyes - The enclosed photo will show or prove it is not another species. We have other photos (20) which show comparison size to plants and fence.

The second day sighting of this fledgling with other young Robins and Parent, proved to my mind without a doubt its relationship - the babies were browsing the grass for worms. The mother was encouraging them to fly when she spotted me walking my dog. By the 3rd day he was flying alone into our yard - about $\frac{1}{2}$ block away from the nest. He was still not too wise and did not see my neighbor & myself sitting on our deck visiting - on apple tree camouflaged our presence. - Bert kept his eye on the Robin while I ran for my camera.

As a former member of the Calgary Bird Club (1950's) and a dedicated bird observer for 60 years I would confirm that the bird described in this record was in respect to size, shape, a flight a pure white robin. - (Jeanette's husband - Albert Brookes) A. Brookes

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK "*" (ie: field marks, habitat, voice, behavior).

1993

Species: Black-headed Grosbeak Date: June 22 (see note other side)

Number: 1 Age: Adult Sex: Male

Locality (Exact information if possible): Escarpment at west end of S. Glenmore Park in Calgary where paved pathway intersects overhead power line

Time: 0540 - 0630 Length of time observed: 5 minutes

Observer: Ross Dickson

Other Observers: _____

Who first saw bird?: Andrew Slater - June 20

Who first identified bird?: Slater

Optical equipment used: (Dickson) - 7X42 Leitz Trinovid

Distance to bird: 15-30 metres

Weather/Light conditions: dark overcast - poor for seeing colours

Was the bird photographed?: No

Comparison species present: Red-eyed Vireo, but voice

Experience with the species: seen in Arizona 1987

Voice and /or call notes: Rapid, loud warble similar but faster than Red-eyed Vireo

Was a field guide used while the bird was under observation?: No If so how do you think it might have influenced your decision?: _____

Habitat discussion: June 22 - Aspen groves

Behavior: singing 10% of time, often moved

Are you 100% certain of the identification?: Yes Are others 100% certain: Yes

How were similar species eliminated?: Black hooded head, ochre breast +

rump, dark wing with prominent wing patches when perched & in flight,

and grosbeak bill eliminate Rosebreasted or Evening Grosbeak.

DESCRIPTION: Write a detailed description. If you are not familiar with all of the terms used to describe a bird see your field guide topography page and try to describe each part of the unusual bird. Get as much information down as possible as to shape, colour, patterns, unique features, etc. SKETCH the bird and show as much detail as possible.

First attempt to find bird afternoon of June 21st about 1700 A.D.T. It was not singing. I surprised it or vice versa as it was drinking from a puddle on the mud pathway partway down the escarpment east of the powerline as Andrew Slater had described. It "rocketed" away through shaded aspens about 10m past me. I could see the black head and large bill and prominent white wing patches but didn't have time to see anything else. I am quite familiar with rose-breasted Grosbeak males and noted the similarity of flight. I did not see rose or white on the bird but the lighting was poor. However when I returned early morning on June 22nd I heard a grosbeak singing near the intersection of the power line and the paved pathway. The bird was either nervous or just athletic because it took about 50 minutes before I was able to get close enough to it to see colours. Up to that time, the bird would sing for about a minute or two at a location, then fly 30 metres away and sing again, but with a 5 minute pause between episodes. When finally seen at 25m in the dead top of an aspen tree, the bird had a black hood, dull orange or ochre at the lower nape, breast and rump. The back appeared to be streaked. There were prominent white wing patches (bigger than wing bars) on the black wings. The belly was light. It had a very large seedeater's bill. The tail was black, square and relatively short (if one uses a robin as a comparison). The silhouette was of a "chunky" bird although it ruffled its feathers while singing to make it look even fatter, but unkempt, too. The song was a rapid warbling series, equivalent in volume and tonal quality to two nearly Red-eyed Vireos, but sung at double the speed.

P.S. A Black-headed Grosbeak was reported in this area in June 1988 by Bill Wilson.

RARE BIRD REPORT

April 6, 1993

FROM: Dennis Baresco
266 7th St. S.E.
Medicine Hat, AB T1A 1J6

Species: Eastern Screech Owl (*Otis asio*)

Identified by: Dennis Baresco, on March 12, 1993; at Police Point Park, in a south-facing hole in a dead cottonwood (where a branch once was) about 45 feet above ground. I distinguished it from the Western Screech Owl mostly by its voice. Subsequently, it was similarly identified by a number of local and out-of-town birders: Rob Gardner, Phil Horch, Garry Newton, Ben Velner, Ross Dickson, Eric Tull, others.

Identification: small owl (about same size as a saw-whet, or a very fat robin) with obvious ear tufts; quite pale gray (nearly the same colour as barkless cottonwood) with distinctive black vertical markings on underparts; thin black line outlining facial disc; beak heavily feathered, so difficult to tell colour; eyes yellow.

Voice: mostly, a low, hollow trill on one note, lasting from 3 to 8 seconds; when excited, this same call would last much longer, and there was also an irregular, "morse code" trilling. The first time I heard the owl when it was excited, a combination of the two above calls continued for over an hour without more than a few seconds break.

Habit: The owl sits framed in the hole, occasionally in the mornings, most of the afternoons. Even when not excited, it would call throughout the day (the trill on one note), from deep inside the hole and from its visible position. I heard it call during the evening from a spot about 200 meters away (where the park borders the golf course), roughly the same area Ross Dickson heard it 10 days later.

History: I first heard it around Christmas of 1991. I thought the sound to be owl-like, but did not recognize it, even from some birdsong records I have. I thought that the sound was coming from inside the dead cottonwood (the same tree where I finally found it), but I could not see anything so assumed, for want of a better explanation, it was a porcupine. I heard it twice more in early 1992, again in early fall 1992, and again around Christmas 1992. Upon hearing it on March 12 1993, I played about 3 seconds of a boreal owl call. This is when it called for over an hour. Following the sound, I finally found it. It was still there, and still calling throughout the day, on April 5 1993.

Feel free to contact me for further information.

CALGARY, ALBERTA T3E 5X2

Please enclose original field notes or copy of notes. Please delay reference to books until sketches and description complete.

Species: Eastern Screech-Owl Date: March 30-31 1993
Number: 1 Age: adult Sex: presumed to be Male
Locality (Exact information if possible): Police Point Interpretive Centre
Medicine Hat
Time: March 30 2115-2145 MST and Length of time observed: March 31 1045-1115 MST
Observer: Ross Dickson
Other Observers: Dennis Baresco (March 31)
Who first saw bird?:
Who first identified bird?: Baresco - early March 1993
Optical equipment used: Dickson - 7x42 Leitz Trinovid Binocular
Distance to bird: 30-40 ft
Weather/Light conditions: bright - partly cloudy
Was the bird photographed?: Not at this time
Comparison species present: None
Experience with the species: Dickson in Southern Ontario in
Voice and /or call notes: March 30 - series of long trills.
Was a field guide used while the bird was under observation?: No If so how do you think it might have influenced your decision?:
Habitat discussion: ancient Plains Cottonwoods on former river floodplain
Behavior:
Are you 100% certain of the identification?: 99% Are others 100% certain: Yes
How were similar species eliminated?: The only small owl with ear tufts is a
screech-owl. The Western Screech-owl, according to my tapes (Alberta
Owl Prowl, Peterson Western) has a completely different call. The trill
sequence is similar to that of an Eastern, as on the Alberta owl prowling tape.
The upper breast area matches description of Maxwelliae race of Eastern
Screech-owl.

Prepared by Ross Dickson March 31 1993

930100

the

The owl was first identified in early March 1993 by Dennis Baresco of Medicine Hat. He now believes the bird to have been on the grounds of the Interpretive Centre since the winter of 1991-92, but definitely throughout the winter of 1992-93. This identification was based on the long "trill" which does not change pitch. Apparently the owl does trill occasionally from inside its roost hole.

On March 30, I listened to it, and tracked it to a tree about 100 metres from the usual roosting tree which is close to the Centre building. The trills were virtually non-stop except for a couple of minutes when I first approached it. The trill lasts 3-4 seconds, one one pitch. This bird has never been heard to utter the typical whinny which drops in pitch.

On March 31, the bird showed up in the roost hole in late morning as clouds gave way to bright sunshine (and presumably the tree grand chamber got warmer). The owl was approximately the size of a softball in diameter (I could see only the belly, breast and head). The overall colour was very pale grey, closely approximating that of the cottonwood bark. There were very thin but distinct dark lengthwise streaks on a very light grey/almost white background on the upper breast and belly. This is a characteristic of the Rocky Mountain Screech-owl *Otus asio maxwelliae*. The upperparts were to me ashy grey rather than buffy brown grey. The bill was pale but I cannot say whether it was greyish greenish or yellowish. It was definitely not dark as is claimed for Western screech-owls but this is considered to be not useful in Canada. I did not see the back. The ear tufts were only partially erect.

Allan W Eckert in The Owls of N America mentions that unlike most screech-owls, this race enjoys roosting on branches in heavy tree foliage during the warmer months (thus inferring that it may be more visible). It generally roosts in natural tree hollows. He also notes that this race is lighter in colour than other more northerly screech owls and ^{semi-individuals} can be among the lightest and mostly faintly marked of all screech owl races. Its distribution extends north into southern Saskatchewan. Eastern screech owls have been reported in 1992 in the Cypress Hills Prov Park in Saskatchewan.

The Western screech-owl which is a possibility was called *Otus asio macfarlanei*, now grouped under *Otus kennicotti*. It, as described in 1891, is larger & darker than Eastern Screech-owl with a darkish bill. Its notes accelerate into a trill deeper in tone than the Eastern Screech-owl. The Medicine Hat bird showed none of these features.

C.F.N.S.
Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK '*' (i.e. field marks, habitat, voice, behavior).

NOTES SECTION: (attach separate sheet if needed).

* Observed two Cedar Waxwings on a branch. One would pass a seed to the other, then hop away. The other would then pass the seed, and hop away. I counted 24 passings of the seed (It may have started before I arrived). Then one ate it.

C.F.N.S.
Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK "*" (ie: field marks, habitat, voice, behavior).

Cooper's Hawk - Seen in 5/2 26, T31, R26 W4. Bird emerged from under a bridge on Kneehills Creek. Probably hunting cliff swallows.

Loggerhead Shrike - Seen in W/2 30 T31, R27 W4. Haven't seen one east of Didsbury in recent years. (Don't remember the last time) (Maybe never?)
