DESCRIPTION: Write a detailed description. If you are not familiar with all of the terms used to describe a bird see your field guide topography page and try to describe each part of the unusual bird. Get as much information down as possible as to shape, colour, patterns, unique features, etc. SKETCH the bird and show as much detail as possible.

I was watching a group of House Sparrows around my feeder, when a slightly smaller bird with yellowish underparts and rump and a prominent white wing - patch flew into the Mayday Tree. After squinting binoculars I noticed that the whole breast and lower breast were medium - bright yellow, as was the rump and the area below the tail. There was also a yellow patch on the sides of the neck.

The sides of the breast and flanks were quite heavily streaked with black. The belly was whitish and there was a prominent white patch on each wing. The crown was grey. The face and back were greenish - gray.

I did not notice a definite ear - patch, which I have seen previously on late - fall males, so I suspect this bird was a female.
