Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
o Provide more details in "Notes Section" on species marked with an ASTERISK * (ie: field marks, habitat, voice, behavior).

Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK * (i.e. field marks, habitat, voice, behavior).

Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK '*' (i.e. field marks, habitat, voice, behavior).

C.F.N.S. Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK "*" (ie: field marks, habitat, voice, behavior).

Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
o Provide more details in "Notes Section" on species marked with an ASTERISK * (ie: field marks, habitat, voice, behavior).

Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK '*' (ie: field marks, habitat, voice, behavior).

Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK "*" (ie: field marks, habitat, voice, behavior).

G1 3 1860 was within 10 feet of shore - did not need binoculars.

C.F.N.S.
Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK "*" (ie: field marks, habitat, voice, behavior).

* CHWA - 1 ♂ seen for several minutes through a window @ 6' foraging in a birch tree. Heavily streaked (black) breast and flanks. One large white wingbar (patch?). Face olive with hint of yellow behind auricular patch.

Run familiar with this species due to extensive bird-banding in Manitoba. (1 seen in Labrador by M. R. Kern on 31 Oct.!)

* ATSP - 2 on N Glenmore Park Transferred to 950403

Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK * (ie: field marks, habitat, voice, behavior).

SUBMITTER:

SEND TO: C.F.N.S. - Bird Records

ADDRESS:

P.O. BOX 981

PHONE:

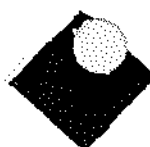

Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet if needed).

Almost all immature males in various stages of plumage dress feeding in a weedy field in the foothills. (Feeding prey atop a fencepost appeared to be a Snow Bunting)

Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet if needed).

C.F.N.S.

Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK * (ie: field marks, habitat, voice, behavior).

NOTES SECTION: (attach separate sheet if needed). Found on eastern tip of island by river.

① Adult bird seen from N. river side of 200 with 7-15 x 200m 35m B.W.S. Distance maybe 80 yards - light excellent. Sturdy bill, all white plumage with black wingtips. Slightly larger than nearby Balladur, but much smaller than nearby Canada Goose. I am speculating that this is bird that was in Glenmore Park last Fall. ② Used Boreal Owl call in an Boreal Owl habitat and this bird responded immediately and often.

SUBMITTER:

SEND TO: C.F.N.S. - Bird Records

ADDRESS:

P.O. BOX 981

PHONE:

Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet if needed).

① Hunting along the eastern shore line at mouth of lake.

C.F.N.S. Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK "*" (ie: field marks, habitat, voice, behavior).

NOTES SECTION: (attach separate sheet if needed).

Both migrants - one bird adult dark plumage. Two very "man" for Sparrow birds. Secondary coverts bleached white; tail very black but white rump. Fit description of Siberian subspecies of Herring Gull - "L. a. borealis". Normal adult. Thayer's - dark eye; pink legs; red spot on bill; delicate bill. Between Herring & California in size. One male Audubon's race. One almost complete albino on higher back - white except for some drab rustiness on scapulars; on secondary coverts, and on head. Minor fallout, stormy weather from northwest had passerines mauling all over some of the trees.

NOTES SECTION: (attach separate sheet if needed)

1. Observed foraging with lot of trees
2. Unmistakable - flew out of grassy area, perched on fencepost along fence row. Flew to nearby farm to do more of the same.

Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK "*" (ie: field marks, habitat, voice, behavior).

RECEIVED

Please enclose original field notes or copy of notes. Please delay reference to books until sketches and description complete.

Species: BLACK-THROATED BLUE WARBLER Date: AUGUST 22, 1995
Number: 1 Age: probably adult Sex: FEMALE
Locality (Exact information if possible): NORTH END INGLEWOOD BIRD SANCTUARY

Time: ABOUT 10:00 AM Length of time observed: APPROXIMATELY 20 SECONDS - 25 SECONDS

Observer: TERRY KOROLYK

Other Observers: NONE

Who first saw bird?: —

Who first identified bird?: —

Optical equipment used: MINOLTA 7-15x35 mm. BINOCULARS

Distance to bird: 30 TO 50 YARDS

Weather/Light conditions: GOOD - LIGHT FROM THE EAST; I WAS LOOKING SOUTHWEST

Was the bird photographed?: NO

Comparison species present: WARBLING VIREO, YELLOW-RUMPED WARBLER, BLACK-POCC

Experience with the species: FEW / FEMALE

Voice and /or call notes: NONE NO

Was a field guide used while the bird was un
think it might have influenced your decision

Habitat discussion: OPEN WOODLAND - A1

Behavior: BIRD FLEW INTO AN APPLE OR

Are you 100% certain of the identification?:

How were similar species eliminated?: Main

Warbler (there were quite a few others
drew suspicion that this was a
rounded Warbler (Warbler Vireo
crown darker than cheeks) and be
that (but miniature Warbling V
have some buff on lower back still
flashes of blue never seen in Warbling Vireo with buff breast
and flank) Darker other possible confusion species - Golden Warbler?
Warbler is blue with brown wing bars. That species does not
wander.

DESCRIPTION: Write a detailed description. If you are not familiar with all of the terms used to describe a bird see your field guide topography page and try to describe each part of the unusual bird. Get as much information down as possible as to shape, colour, patterns, unique features, etc. SKETCH the bird and show as much detail as possible.

All key field marks were noted as in above diagrams. Figure 1 was my first view of the bird as it alighted on an aspen branch. I noted the pale wing patches as it landed then was able to see the head in profile as in figure 2. As the bird moved up the branch a few feet, it turned somewhat to its right allowing me a perfect view of the head again and the buffy ~~underparts~~ ^{breast} and flank. The bird then flew further westward to the next aspen.

Species: LESSER BLACK-BACKED GULL Date: OCT 19 1995
Number: 1 Age: JUVENILE ^{IMMATURE} Sex: UNKNOWN (PROBABLY A FEMALE)
Locality (Exact information if possible): INLEWOOD BIRD SANCTUARY, CALGARY
ON THE GRAVEL BAR ON THE BOW RIVER
Time: 4:50 PM Length of time observed: 15-20 min
Observer: TERRY KOROLYK
Other Observers: NONE
Who first saw bird?: AS ABOVE
Who first identified bird?: AS ABOVE
Optical equipment used: BUSHNELL SPACEMASTER 22X WIDE ANGLE SCOPE
Distance to bird: APPROXIMATELY 40-50 METRES
Weather/Light conditions: GOOD; VIEWING FROM SOUTHWEST TO NORTHWEST.
Was the bird photographed?: NO
Comparison species present: RING-BILLED, CALIFORNIA, AND HERRING GULLS
Experience with the species: HAVE SEEN ADULT BIRDS IN ENGLAND
Voice and /or call notes: NONE
Was a field guide used while the bird was under observation?: NO If so how do you think it might have influenced your decision?:
Habitat discussion: GRAVEL BAR ON SHALLOW RIVER
Behavior: RESTING WITH SOME PREENING, LITTLE MOVEMENT.
Are you 100% certain of the identification?: YES Are others 100% certain: ---
How were similar species eliminated?: (WATCHED TERTIAL ^{IMMATURE} RING-BILL-LIKE SIZE UNBROOD
GREATER COVERTS ELIMINATED HERRING GULLS RING-BILL-CENTRED TERTIALS
AND GREATER COVERTS WITH NEAR WHITE TAIL ELIMINATED
JUVENILE OR FIRST WINTER RING-BILL (TERTIALS BROWNISH BROWN
AND GREATER SORT OF TERTIAL PALE GREY) JUVENILE CALIFORNIAS
PROBABLY A DARK CHOCOLATE BROWN. A CALIFORNIA GULL PROBABLY
WOULDN'T HAVE ATTAINED AS WHITE A HEAD AT THIS BIRD UNTIL ITS
SECOND YEAR AT LATEST IF THAT WERE THE CASE. THE BULL WOULD
HAVE TO BE ALMOST ENTIRELY PALE (SMALL DARK TIP)

SECONDARY COVERTS BLACK
WITH CLEAR WHITE BORDERS

ALL MEDIAN AND LOWER
SECONDARY COVERTS
MIXTURE OF BLACK AND
BROWN TONES BUT STILL
WITH CLEAR WHITE
BORDERS

This gull was about the size of a ^{large male} King-billed Gull. One of the most immediately noticeable things about the bird were the relative broadness of the tertial, greater covert, lesser covert, and scapular feathers in relation to those of other gulls. These feathers were illuminated probably by the fact that they were all outlined with a perfectly-defined white trim, although there was a hint of the beginning of some barring on the outer, greater covert, primaries were blackish with narrow white streaks on the tips. Base tertial and greater covert colour was blackish, but colour on the median and lesser covert to the scapular seemed to be a mixture of black with a sort of pale reddish brown (but, again, these feathers were mostly trimmed in white as well and had some degree of barring, across a central vertical shaft up each feather. The mantle over very densely blackish, seeming almost stretched horizontally and vertically. Tail had a very broad blackish band but base of tail rump and abdomen were snow white with fine, but lengthy, blackish bars crosswise. The tail was tipped very narrowly white. Legs were flesh-coloured. Upper beak rather finely stretched dusky. Head relatively whitish except for "squint" smudging around eye. Very faint smudging remnants on ear coverts. Bill blackish and at least as long as a King-billed Gull's bill but a little thicker. There may have been a small pinkish spot at base of lower mandible or this may have been feathers (this was not clear). I believe the state of the head plumage and other character as well as fact that scapulars did not have appearance as much black as greater coverts and tertials (somewhat really but not completely) meant that the bird had moulted somewhat into first winter plumage.

Species: SLY-BACKED GULL Date: NOV. 4, 1995
Number: 1 Age: 2nd winter Sex: UNKNOWN (Probably Female)
Locality (Exact information if possible): INGLEWOOD BIRD SANCTUARY, BARRE, VERMONT
PEOPLE ON THE BEW RIVER
Time: just after 2:00 PM Length of time observed: 5-10 minutes and no on
Observer: TERRY KAROLYK
Other Observers: Penny Beth Clare Martin
Who first saw bird?: TERRY KAROLYK
Who first identified bird?: TERRY KAROLYK
Optical equipment used: BUSHNELL 7x35 Binos, Bushnell 22x (Polaroid) scope
Distance to bird: 20 meters to approximately 40 meters
Weather/light conditions: Good, light from the south-southwest
Was the bird photographed?: NO
Comparison species present: 4 Eastern Herring Gulls, 2 Snowy Geese, 1 House Sparrow
Experience with the species: NONE
Voice and /or call notes: NONE
Was a field guide used while the bird was under observation?: NO If so how do you think it might have influenced your decision?:
Habitat discussion: Barre Falls in River during early winter
Behavior: High post observation at first then landed on grassy bank in
Are you 100% certain of the identification?: Yes Are others 100% certain: additional notes
How were similar species eliminated?: Size eliminated Puffins, Gulls, Snowy Geese, actually limited further identification to Herring's or Slaty-backed Gull. Immature Herring's have brownish bills which pale with age. This gull had an obviously almost blackish tail and breast patches, have been a first-summer for Slaty-backed Gull. According to "Gull" "Slaty-backed" it's a chance can deny of the "Slaty" "molted" into well into second-summer plumage.

DESCRIPTION: Write a detailed description. If you are not familiar with all of the terms used to describe a bird see your field guide topography page and try to describe each part of the unusual bird. Get as much information down as possible as to shape, colour, patterns, unique features, etc. SKETCH the bird and show as much detail as possible.

Myself and another observer (Penny Smith) were standing by the river when I noticed this big gull flying towards me from downriver. I remarked on its heavy build. The bird passed by not more than 25 yards away in perfect lighting conditions and I had

great looks at the upperwing, part of the continuous mantle, head, and eye. The bird was very pale. Mantle, scapulars and all upperwing secondaries were sort of dirty white with brown flecks. Outer primaries were a beautiful solid brown (not the same tone as Payer's gull). Secondaries were slightly paler than the primaries with pale tips slightly worn. Greater secondary coverts were slightly paler than secondaries, again with slightly worn tips and sides. These feathers seemed unusually long, maybe even being longer

than the secondaries. Remainder of upperwing and mantle, scapulars and legs were sort of a dirty white with brown flecks. Eye was a pale reddish brown and seemed very unusually small unlike anything I had seen before in a gull. I am theorizing that it was paling "from brown to yellow" accounting for the unusual shade. Structure of the eye socket seemed different from anything I'd seen around here (at least a short look as the bird flew by). Outermost primary had only 3 outermost primary being brown. Bill was extremely pale at base with dark tip then seemed to be paling from the tip (completely both at bill could not be obtained but these features, I am certain). Tail (seen while the bird was resting sitting on a gravel bar) was almost blackish and contrasted with pure white wings. Unlike most gulls, tail feathers seemed vertically coloured rather than horizontally across the feathers. At this point, the bird's size compared to Herring Gull, dwarfing all nearby Ring-billed Gulls.

Species: HORNED GREBE Date: JULY 02, 1995

Number: 1 Age: unknown Sex: unknown

Locality (Exact information if possible): RAILWAY DROUGH, IRIDIANS DROUGHS AREA

Time: 2:45PM Length of time observed: 30 minutes

Observer: Terry Kocolyk

Other Observers: None

Who first saw bird?: —

Who first identified bird?: —

Optical equipment used: 22x Bushnell Spacemaster Spotting Scope

Distance to bird: 100-150 metres

Weather/Light conditions: Excellent - no glare; light from behind

Was the bird photographed?: No

Comparison species present: Various waterfowl - mostly plumed Horned Grebes

Experience with the species: much

Voice and/or call notes: —

Was a field guide used while the bird was under observation?: No If so how do you think it might have influenced your decision?: —

Habitat discussion: water

Behavior: Resting on water - occasional diving

Are you 100% certain of the identification?: Yes Are others 100% certain: —

How were similar species eliminated?: Eared Grebe eliminated on basis of different body shape and proportions. Body coloration on neck consistent with that of Horned Grebe (Eared is black in that area) while "Horned" were most present, there was not a "ridginess" there.

NOTES SECTION: (attach separate sheet if needed).

① Included one male of the Audubon subspecies & one female subspecies
 ② Perched on a Linnet 1.6 km east of Long Hest Corner. One
 sign, I watched this bird for a few minutes and took pictures. No other
 birds were located. ③ Heard clearly & closely in marshy area
 around Long Hest sign. ④ Adult bird - male, a Bill's Sparrow (not sure but it may have been a Downy or Yellowlegs) then took it to a netter
 on one of the tarred tracks at the refinery

NOTES SECTION: (attach separate sheet if needed).

1. Seen clearly but at some distance as it was travelling south on Deepfoot trail. It was perched on a snag. The immature bird-light breast had a dusky breast; completely dark brown back, head.

NOTES SECTION: (attach separate sheet if needed).

① One almost fully adult Golden Eagle carried a ground squirrel to a large immature bird on the north rim. I was not clear what the immature bird was doing with the prey. (I was assuming from the noise) but it was not actually swallowing and then it died. Cliff Swallows at band 4-5, separate nests. Colonies here.

② This bird was probably an adult female of the Columbian subspecies as moulted and upperparts plumage and breast streaks were a pale dark grayish brown rather than reddish-brown of Red-backed. In the Red showing grayish cast to it.

SUBMITTER:

SEND TO: C.F.N.S. - Bird Records

ADDRESS:

P.O. BOX 981

PHONE:

Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet if needed).

C.F.N.S.
Bird Record Sheet

Please print information legibly.

- o GIVE EXACT LOCATION. Fill in a new column for each location visited.
- o List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- o CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- o Provide more details in "Notes Section" on species marked with an ASTERISK "*" (ie: field marks, habitat, voice, behavior).

NOTES SECTION: (attach separate sheet if needed).

On the same suburban grassy area thicket on the 'Bridge' trail. Heard to call clearly three "Puk" very uniform and slightly ascending (unmistakable) I waited for about 20 minutes, but could not see the bird. One immature bird; the other not seen clearly.

SUBMITTER:

SEND TO: C.F.N.S. - Bird Records

ADDRESS:

P.O. BOX 981

PHONE:

Calgary, Alberta T2P 2K4

NOTES SECTION: (attach separate sheet, if needed)

On possible juvenile Western Bluebird, independent very dense forest but fairly strong reddish tinge seen at 80m + 25 yards. Nearby immature Mountain Bluebirds much paler.

C.F.N.S. Bird Record Sheet

Please print information legibly.

- GIVE EXACT LOCATION. Fill in a new column for each location visited.
- List the number of each species seen at each location by sex and/or age where they are determinable, otherwise list total number.
- CIRCLE all nesting records and elaborate in "Notes Section" at the end.
- Provide more details in "Notes Section" on species marked with an ASTERISK * (i.e. field marks, habitat, voice, behavior).

NOTES SECTION: (attach separate sheet if needed).

2nd winter bird - clear grayish mantle; brown (not blackish) primaries with
 whitish crescent; broad rounded bill about 1/2 inch from base, not dark
 left longest & slender; dark legs (Herring's would be red by this time)
 2 previous adult birds - bright yellow bill with bright reddish spot on gray
 only a few streaks in head (1st winter bird; fairly pale & worn; probably
 same bird seen on the 14th)

NOTES SECTION: (attach separate sheet if needed).

Photostaken
A. This Warbler was immature and may have been somewhat indomestic. Upperparts blackish-brown with NO markings except some pale buffy tinge on the greater median coverts. Tarsus black on tail bushy noticeable. Rufous cap on forehead yellow on sides of neck. Underparts belly white for a few streaks in not very good lighting, probably not larger than accompanying. Longbill (brown) under pale brown. Light plumage short as light size longer than longbill; eye dark; bill black with pale base.

NOTES SECTION: (attach separate sheet if needed).

ALBERTA RARITY REPORT FORM

Common Name: Northern Parula

Scientific Name: *Parula americana*

Number of Individuals: 1 **Sex:** female

Age: unknown - possibly an adult

Locality: Inglewood Bird Sanctuary, Calgary.

Date(s) Seen: August 24, 1995

Time: 4:40 - 4:55 p.m. MDT

Reporting Observer: Michael Harrison. 46 Shannon Terr. S.W., Calgary, Alberta T2Y 2Y7

Other Observers: none.

Weather/Light Conditions: Partly overcast. A brief shower had just passed through the area. Light winds. Good light conditions for observation.

Optical Equipment: Leica 8x40 binoculars.

Distance to bird: 3 metres at eye level. **Duration of Observation:** Bird observed twice for less than a minute total.

Habitat: Deciduous riverine forest with well developed shrub understory. Typical plant species include balsam poplar, white spruce, saskatoon and red-osier dogwood.

Behaviour: Bird observed in mixed-species flock of migrant warblers and resident chickadees. The flock, including the Northern Parula, were observed just after a rain shower and were actively feeding in the understory. The Northern Parula was observed hover-gleaning on two occasions.

Description: Typical warbler shape and behaviour. Appeared slightly smaller than the Yellow-rumped Warblers and Blackpoll Warblers observed at the same time. Uniform, solid slate blue-gray upperparts. When observed from above a distinct yellow-green patch on the mantle was noticeable. No yellow or white was observed on the rump. White eye-crescents were observed and were similar in thickness to those of a MacGillivray's Warbler. Eye colour was not noted but appeared to be black. Bird gave the appearance of being short-tailed relative to its body size; no white or yellow tail spots were noted on the slate blue-gray tail. Two thin white wing bars were observed but were not very obvious. The bird had a solid bright yellow throat and chest. No hint of breast bands associated with adult male Northern Parulas. Lower underparts and undertail coverts were white. The boundary between the yellow chest and white underparts was fairly sharp. Bill colour was not noted. Legs were a uniform dull pink. Brighter yellow on throat and chest, more distinct yellow-green mantle patch, and lack of breast bands would tend to indicate that this individual was an adult female.

List any books or references used in identification:

(a) at time of observation: None.

(b) after observation: Curson *et al.* (1994) *Warblers of the Americas*; National Geographic Society (1987) *Field Guide to the Birds of North America*.

Voice: None heard.

Similar Species: Nashville Warbler, Orange-crowned Warbler, and Canada Warbler. All lack distinct white wing bars; yellow underparts are more extensive; lack distinct yellow-green patch on back. Nashville and Orange-crowned Warbler have yellow upperparts. Nashville and Canada Warbler have complete eye-rings.

Photographs: None.

Description from: X* Contemporaneous Notes; _____ Later Notes; X Memory.

* copy attached

Experience with species: Observed numerous Northern Parulas in Arkansas the previous summer. Have observed Nashville Warblers, Orange-crowned Warblers and Canada Warblers in western Canada on several occasions.

Are you positive of the identification: Yes.

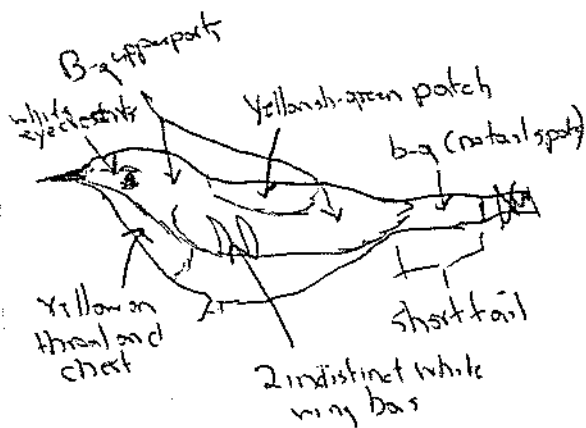

Signature: Michael Harrison

Date: August 25/1995

4:40 pm - (approx.)

Two rare finds in the Clarendon area - Summer 19

col 1/2

Loggerhead Shrike - nest approx. 100' from gravel road in
row of elm trees. nest visible from road. 2 adults
making repeated trips to nest. Appeared to be feeding. Nest
on 16' from ground - June 25th 1995 at 2 pm.
checked area July 12th, 6:30 pm, observed 1 shrike in
general area. 5.8 KM East + 3.2 KM South. Number of
young unknown.

col 2/2

Loggerhead Shrike - nest in Casagana hedge within the
Municipal Park NE of Clarendon. nest 5' above
ground. First seen May 28th, 2 adults hawking insects
on 24th both adults feeding young. Checked nest area
and 2 + perhaps 4 young. Both were afternoon check

te - our first find in 15 years of birding in this
area. We cross-cross a 25 miles $\square$ each year
covering hundreds of miles. A local birder for over 5
years has never found a nest. She has now!
